### Unified module because....

A full SLIM & MODULAR range of devices with different functions, operations and purposes (code key pad, badge readers, micro stop and go display control panels, and stop and go display panels, entryphones and button panels on same series...) designed and made bearing in mind a single module of one size (Same for all). In fact, all the devices have the same appearance, size and modularity in order to be interchangeable and to be housed in the same unified chasing of the previous lock.

### Convertible because...

Using unified flanges, cases and boxes, any unified SLIM & MODULAR device is convertible into 5 different types that can be installed in any way, next to the door, based on the assembly needs found in the field.

**Assembly type 1**  
**fully aligned concealed**  
for recess-mounting without flange on the same plane of the door frame panel

**Assembly type 2**  
**fully aligned at milling**  
or recess-mounting with front flange on the same plane of the panel surface

**Assembly type 3**  
**for conventional flush mounting**  
with front flange overlapping door frame

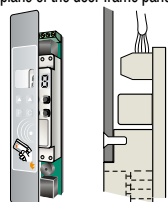

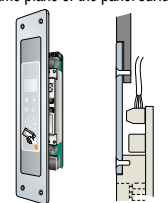

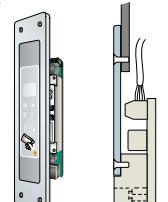

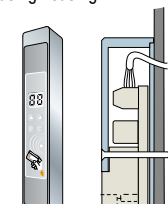

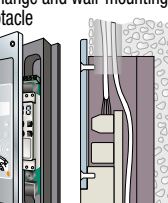

**Assembly type 4**  
**for surface mounting**  
with using housing

**Assembly type 5**  
**for recessed wall-mounting**  
with flange and wall-mounting receptacle
