TECNODIMENSIONE®

Mini-electrical drop bolt with full coverage “CLEAN COVER” made by solid block of anodised aluminium. Ideal for surface mount and surface applications on any type of “CLEAN ROOM” door frame.

ordering information

Q.ty

MODELS

N°

MICROREDLOCK “Click & Go”
for surface mounting in protective “CLEAN COVER” housing

(overall dimensions in mm)

Ultra compact MICROREDLOCK mini-electrical drop bolt housed in protective “smooth” (roughness-free) and easy to clean case. Manageable and easy to install on door surfaces without any need to drill and/or cut door frames.

Models for 12 Vdc power supply

MICROREDLOCK mini-electrical drop bolt in “CLEAN COVER”. Complete with flying cable (2m) with “CLICK & GO” Converwirex converter with 1 female RJ45-8 pole quick fit plug for instant connection to the Pharmatronix control unit via structured and pre-assembled Wirex cables. Protective Anticorodal, anodised and mechanically brushed aluminium “CLEAN COVER” made by solid block for easy installation with concealed retractable non-removable bracket.

The kit contains two components:

element “A”: is the case that includes the electrical drop bolt to be secured on the door counter frame.

element “B”: is the loose reference bolt to be secured on the door leaf frame matching element “A”.

- FAIL-SAFE (anti-panic = unlock without power) version with 100% ED coil for a continuous operation.
- Includes a Reed sensor to control door status.
- Power supply 12 V DC/390 mA.
- Element A dimensions 80 x 30 x 44 mm
- Element B dimensions 25 x 30 x 44 mm
- Weight g 320

00803A2RCZW
Lh/Rh reversible

Models for 24Vdc power supply (on request)

Models with 24Vdc power supply (on request)

Mini-electrical drop bolt for MICROREDLOCK surface mount in “CLEAN COVER” like above but with 24Vdc/140mA power.

00803A4RCZW

MICROREDLOCK mini-electrical drop bolt in “CLEAN COVER” installation method

Element “A” exploded view

“CLEAN COVER” that includes the mini-electrical drop bolt (to be secured on the counter frame)

Element “A” assembly sequence

to be secured on counter frame:

- secure the bracket (1) on the counter frame with the four FS fastening screws.
- place the cylinder Reed sensor (2) in the matching FA hole.
- lock the sensor by screwing the G nut into the FG hole.
- secure the mini-electrical drop bolt body (3) to the bracket (1) with the two supplied ES screws.
- insert the protective cover (4) over the assembled electrical drop bolt (3), + bracket (1) + sensor (2). Complete by securing the case (4) with the four supplied AS assembly screws that bind the components.

Element “B” exploded view

“CLEAN COVER” that includes the block counter bolt (to be secured on the door leaf)

Element “B” assembly sequence

to be fastened on the door leaf

- secure the bracket (5) on the door leaf with the two FS fastening screws.
- insert the block counter bolt (6) on the bracket and fasten together with the two supplied AS assembly screws that bind the two components together.

Example of a door complete with permanently assembled MICROREDLOCK mini-electrical drop bolt

element “A” (mini-electrical drop bolt) element “B” (block counter)

Note:

AS = 6 supplied assembly screws
ES = 2 supplied electrical drop bolt screws.

FS = 6 fastening screws supplied by the installer (based on the type of door frame).

G = 1 supplied nut.

SLIM-DOORSTRIKE ELECTRICAL BOLT IN "CLEAN COVER" ASSEMBLY METHOD

"A" element exploded view

Housing protective which includes mini spring bolt (to be mounted on door)

Assembly sequence for element "A"

to be mounted on door frame:

- secure the bracket (1) on the door with the two FS fixing screws
- Insert the protective housing (2) to cover the bracket (1).
- insert the mini spring bolt (3) in the hole in the bracket and assembly all parts with the two supplied pass-through AS screws that link all the three parts together.

"B" element exploded view

Housing protective "CLEAN COVER" which includes electrical door strike (to be mounted on door-post)

Assembly sequence for element "B"

to be mounted on door-post frame:

- secure the bracket (4) on the door-post with three FS fastening screws.
- secure the electrical door strike body (5) with the two SDS screws supplied with the bracket (4).
- insert the protective housing (6) to cover the bracket (4) with electrical door strike (5) and connect all parts with the two AS supplied pass-through screws that link all the three parts together.

Example of one door complete with doorstrike
CLEANCOVER-DOORSTRIKE unit finally mounted

Note:

AS = 4 assembly screws
(+ SDS = 2 screws for electrical door strike) supplied together.

FS = 5 fixing and fastening screws on frame should be provided by installer (based on type of frame).

**PROFESSIONAL
ELECTRICAL LOCKS**

Introduction to the choice of Mini electromagnets multipurpose

The entire range of Tecnodimensione's professional electromagnets is designed and built to meet the most demanding “electromagnetic lockout” requirements.

The types of mini-electromagnets are intended for:

- Applications on structures designed keep specific doors closed. Not necessarily to provide extreme resistance to attempted break-in, but whose purpose is that of monitoring to prevent forced entry and to discourage misuse, diversions or damage to access doors. Doors through which unauthorised persons must not pass (e.g. emergency exits, classified areas such as sterile rooms, hospital wards with problematic patient areas, etc.). At the same time, these controlled doors can be opened and unlocked without jamming in the event of a hazard, fire, etc., becoming safe passageways or escape routes with automatic panic release in the event of a power failure.

- Very small, compact and elegantly designed. They achieve their goal of being “the electromagnetic locking block” with the lowest aesthetic impact on the door structure compared to conventional electromagnets available on the market.

- Two holding functions: front anchoring with “magnetic adhesion” or recessed with ‘shear locking’.

- Functional purposes: “Fail-Safe” automatic anti-panic and crush safe.

- Power supply: 12Vdc/7mA (very low consumption unit).

- External protection: with anodised monobloc aluminium “Clean Cover” protective housing machined from solid, for easy, non-removable surface mounting with no visible screws.

MINI ELECTROMAGNETS MULTIPURPOSE

**DRILL&
GO**
Cut-Free

2 types available

**FOR EASY
SURFACE MOUNT
INSTALLATION**

Slim Minisentrylock Series in "CLEAN COVER" housing

FRONT LOCKING

Front mounted mini-electromagnets with magnetic adhesion.

Frontal anchorage is achieved by magnetic adhesion between the face of the electromagnet and the face of the counter plate.

In practice, when the door is aligned in the stop moulding, the two coplanar surfaces fit together perfectly and a magnetic hold is established between them (with a powered holding electromagnet).

Key features:

- **Fail-Safe:** emergency unlock even in the event of a fault (release in the event of a power failure).
- **Crush-safe:** the unlock door command works even if pressure is applied to the door (e.g. crowds of people).
- **Monitoring:** fitted with a sensor to indicate door status (closed/open).

Slim Shearlock Series in "CLEAN COVER" housing

SHEAR LOCKING

Recessed shear-locking mini-electromagnets.

The shear anchoring is obtained by means of 2 stainless steel pins (located at the ends of the face of the electromagnet) which fit into the 2 correspondingly shaped seats (indentations) on the face of the floating counter plate.

In practice, when the door is aligned in the stop moulding, the electromagnet (when energised) attracts the face of the floating counter plate, which, when raised, aligns with the corresponding face of the electromagnet.

This causes the 2 stainless steel interlock with it. In this case, the high resistance shear locking is by recessed mounting.

Key features:

- **Fail-Safe:** emergency unlock even in the event of a fault (release in the event of a power failure).
- **Resistance:** is greatly increased (compared to simple magnetic adhesion) due to the magnetic interlocking of the two stainless steel pins.
- **Monitoring:** fitted with a sensor to indicate door status (closed/open)
