TECNODIMENSIONE
security with style

Introduction to Tecnodimensione devices and systems.

Security systems, single or interlocked door management systems and access control.

Tecnodimensione has been assisting professional installers for over 35 years with its exclusive "know-how", its efficient organisation and the professionalism of its technicians.

For over 35 years, Tecnodimensione has been constantly anticipating technological innovation by "exclusively" using highly reliable products with consolidated performances.

Thanks to its proven experience, its know-how and dedication, it has developed a standard program that includes a range of professional equipment manufactured according to state-of-the-art technologies and has been designed to provide more demanding customers with efficient safety installations.

For over 35 years, Tecnodimensione has been anticipating and interpreting the actual needs of customers, providing them with appropriate solutions and offering realistic installations that can be easily and quickly deployed.

Key solutions that are designed to last in time and on which installers can always rely... **All future generation products are compatible and perfectly interchangeable with those of previous generations...** in order to ensure that existing and new installations are able to challenge time with Tecnodimensione.

The global reliability of Tecnodimensione systems is confirmed by thousands of existing installations...

...This is why, it is able to meet the specific requirements of banks, post offices, jeweller's shops, chemistries, restaurants, hotels, discos, commercial centres, condominiums and private homes, offices with access-protected areas, computer rooms..

...Allowing all tasks that require the management and control of accesses to be performed safely and trouble-free.

This is a partial description in English of our warranty terms.

In any case and for any reasons the complete and valid sales&warranty terms are those written at the following page in Italian language that exclusively regulate all our sales and supplies.

WARRANTY

The products Tecnodimensione, of our company Dalmiglio snc, such as electrical locks, locks and/or related components and devices carry a two-year guarantee from the date of installation and in any case shall be for not more than 30 months from the date of shipment (date of our packing list and/or our invoice).

As regards components not manufactured by ourselves, our liability is limited to the guarantee given to us by our supplier. It is up to the purchaser to prove defects and shortcomings of any kind.

This warranty applies only when the locks and devices are powered with one of Tecnodimensione's power control units or with proper approved equipment, when installed by specialised operators, in accordance with the instructions, using proper mounting kits, with wiring systems that meets the regulations in force, and kept free from surface rust and dirt and positioned and serviced in respect with the limits fixed by specific data sheets and/or instruction manuals.

In any case the products must be only utilised for the purposes only for which are intended as described in the application notes. Any application not expressly indicated or authorised is considered misuse. The warranty does not apply to products which have been damaged, mistreated, modified, misused, or subjected to neglect or abnormal use and/or storage, and damaged by natural wear, unprofessional or negligent treatment, chemical, electro-mechanical or electrical influences.

In no case and for no reason do we assume any responsibility for incidental or consequential damage arising from defective products, failure or lack of operation of systems and/or components whether during the warranty period or when the warranty has expired. To all effects it is to be excluded that any components, devices and/or systems are considered a substitution of an insurance policy. Our sole liability shall be to repair or replace, according to our discretion, defective parts which shall be sent to us at the expense of the purchaser who will also bear the cost entailed for the return of the goods.

The following parts are not included in the warranty: lamps, fuses, coils, glass, gaskets, batteries, and all parts subject to the normal wear and consumption. All costs and responsibilities related to transportation, procedures and also for specific documentation, labelling, tests, approvals and/ or homologations, if required, from the moment of exportation/importation and thereafter, are exclusively the care of the importer.

In no case whatsoever can reduction of prices or cancellation of order, be requested by the customer. It is implicitly understood that the importer has the full capability to arrange the correct installation, start-up, servicing and all the necessary and proper ancillary procedures for the correct use and function of the products, devices and complete systems; for this reason also, Tecnodimensione will not carry out any technical intervention abroad, even with payment.

All information, suggestions, instructions and assistance, is provided by our technical department in Gorgonzola (Milano), Italy, within the framework and following the procedures available to us and when contacted by specialised installers.

Place of Performance and Jurisdiction

The place of performance and jurisdiction as regards direct or indirect disputes, also applying to legal suits in relation to bills of exchange and cheques, is Bergamo, Italy. We are also entitled to institute proceedings at the purchaser's location. Only Italian law shall be apply, foreign law shall be excluded.

BASIC TERMS

- Packing:** for normal shipment included
- Delivery:** ex our works (Gorgonzola - Milano - Italy)
- Delivery time:** normally 1 week or 20 working days
(according with our standard models and required quantities).
Special requirement has to be programmed accordingly.
- Payment:** 1) in advance with the order (3% discount)
2) net by irrevocable and confirmed letter of credit, fully negotiable by our Italian Bank
- Shipment:** by "fast post" or truck (in Europe)
by other ways to be defined
(for international deliveries)

The illustrations and technical specifications are furnished for your information.

The manufacturer reserves the right to modify the devices and systems, at any time and without previous notification, as he sees fit in order to improve their performance or for any other valid business need.

The name and trademark TECNODIMENSIONE®, and the names Dualblok®, Bluelock®, Redlock® and Regoplus® are registered trademarks and of exclusive property of DALMIGLIO S.r.l. (Tecnodimensione® Department)

For all others sales and warranty terms, are exclusively applicable our general sales and warranty conditions that are fully and tacitly accepted by you at the moment of your order.

CONDIZIONI GENERALI DI VENDITA

Ogni committente, nel passare ordinazioni, accetta implicitamente tutte le condizioni sotto esposte.

RISERVATO DOMINIO

- 1) Le merci sono vendute con patto di riservato dominio sino al totale pagamento del prezzo pattuito.
- 2) L'inadempimento nel pagamento provoca decadenza delle eventuali condizioni di pagamento rateali rendendo esigibile immediatamente l'intero importo residuo dovuto, con diritto per il venditore di esigere l'immediata restituzione del bene.
- 3) Le somme incassate costituiscono indennizzo ed a tale titolo vengono trattenute dal venditore senza pregiudizio del totale risarcimento dei danni e spese.

PREZZI

- 4) I prezzi si intendono per merce resa franco nostro magazzino di Gorgonzola (MI).
- 5) Qualsiasi aggravio derivante da fluttuazione dei cambi, variazione del regime doganale, tributario, contributi, salari, materie prime, riforme monetarie o comunque da altri fattori imprevedibili, sarà addebitato all'acquirente mediante variazione proporzionale del prezzo della merce da consegnare. Faranno in ogni caso fede i prezzi in vigore alla data della consegna.

TRASPORTI

- 6) Salvo speciali accordi scritti in contrario, le spese di trasporto a destino e qualunque altra spesa o tassa che dovesse gravare sulle merci sono a carico dell'acquirente.
- 7) La merce, con qualunque mezzo inviata, anche se franco di porto, viaggia sempre a rischio e pericolo dell'acquirente.

CONSEGNE

- 8) I termini di consegna della merce non sono impegnativi e sono subordinati alle possibilità della produzione e di inoltro da parte della venditrice.
- 9) La data di consegna indicata in conferma d'ordine può essere comunque ulteriormente prorogata per casi di forza maggiore.
- 10) È in ogni caso esclusa una qualsiasi responsabilità per danni a carico della ditta venditrice in conseguenza di ritardata o parziale consegna della merce.

PAGAMENTI

- 11) Tutti i pagamenti devono essere effettuati presso la nostra Sede di Treviglio (BG). Assegni saranno accettati salvo buon fine. Effetti cambiali o ricevute bancarie non costituiranno novazione. Gli agenti non sono autorizzati agli incassi, salvo esplicita e regolare delega scritta.
- 12) Non sono accettati arrotondamenti rispetto all'esposto in fattura.
- 13) Sui pagamenti, ritardati, salvo ogni ulteriore diritto della venditrice, verranno conteggiati gli interessi di mora al tasso bancario vigente.
- 14) In caso di ritardato pagamento, il fornitore si riterrà esonerato dal prestare la garanzia sui prodotti forniti, riservandosi altresì il diritto di sospendere le forniture relative a tutti gli ordini in corso con il cliente moroso.
- 15) In nessun caso il cliente è legittimato a ritardare o sospendere i pagamenti anche in caso di contestazione di una o più forniture.

RECLAMI E CONTESTAZIONI

- 16) Non sono ammessi reclami di alcun genere se non sono fatti per iscritto entro 8 giorni dalla consegna.
- 17) I resi non saranno comunque accettati se non espressamente autorizzati per iscritto dalla venditrice ed in porto franco. In ogni caso, ogni reso è soggetto ad un addebito del 20% del prezzo di acquisto per concorso spese di controllo e ricarico.

RISOLUZIONE DEL CONTRATTO

- 19) Qualora nei confronti del cliente vengano elevati protesti di assegni e/o cambiali, vengano promosse procedure esecutive o concorsuali di concordato preventivo o di fallimento, il fornitore si riserva la facoltà di risolvere unilateralmente il contratto, dandone comunicazione scritta al cliente.

CONDIZIONI DI GARANZIA

- 1) La Ditta Dalmiglio S.r.l. garantisce per le sue forniture la mancanza di difetti di materiale e di costruzione secondo i normali dettami della tecnica.
- 2) L'operatività della garanzia è condizionata alla sottoscrizione espressa, da parte del cliente, della conferma d'ordine nonché delle clausole ivi contenute e richiamate.
- 3) La garanzia ha la validità di due (2) anni a partire dalla data di installazione delle apparecchiature da parte del cliente. In ogni caso, la garanzia non è più operante e decade comunque trascorsi trenta (30) mesi dalla data di consegna della merce. I termini sopra indicati si intendono espressamente quali termini di decadenza.
- 4) La garanzia si limita alla sostituzione o riparazione franco nostro magazzino di Gorgonzola (MI) di quelle parti per le quali la Ditta venditrice riconosce un difetto di materiale o di costruzione.
- 5) Sono escluse dalla garanzia le seguenti parti: lampadine, fusibili, relè, bobine di elettroserrature, cavi elettrici, interruttori, manopole, vetri, guarnizioni in gomma, batterie elettriche, suonerie, campane e in ogni caso, tutte le parti soggette a normale esaurimento ed usura.
- 6) L'installazione e messa in opera del materiale venduto dovrà essere effettuata da Ditta specializzata con la scrupolosa osservanza della normativa tecnica applicabile e vigente in materia e, in ogni caso, nei limiti d'impiego prescritti e seguendo le istruzioni tecniche della venditrice.
- 7) La garanzia decade:
 - a) se la merce è stata in qualunque modo modificata dal cliente o da terzi non espressamente autorizzati dalla Ditta venditrice;
 - b) se sono state montate parti il cui uso non è espressamente ammesso dalla Ditta venditrice;
 - c) se il cliente non osserva le prescrizioni della Ditta venditrice circa l'uso, i limiti d'impiego e la manutenzione della merce.
- 8) È espressamente escluso il diritto dell'acquirente al risarcimento di danni provocati direttamente od indirettamente dall'impianto o da singoli componenti anche al di fuori della garanzia in qualunque momento e per qualsiasi motivo. Viene ad ogni effetto escluso che l'apparecchiatura o l'impianto possa essere ritenuto sostitutivo di polizza assicurativa.
- 9) È escluso il diritto del cliente allo storno del contratto di compravendita o ad una diminuzione del prezzo, a meno che la Ditta venditrice si trovi nella impossibilità di eliminare il difetto o di sostituire, con materiale funzionalmente equipollente, anche se di tipo diverso, il materiale riscontrato difettoso.
- 10) Eventuali interventi tecnici e di controllo richiesti, per casi particolari, alla Dalmiglio S.r.l. saranno fatturati al cliente secondo le tariffe nel settore specifico.
- 11) Eventuali chiamate non giustificate da una effettiva irregolarità dell'apparecchiatura o dell'impianto saranno a totale carico del cliente.
- 12) Gli interventi tecnici o di controllo della Dalmiglio S.r.l. per l'estero non potranno essere comunque richiesti salve specifiche e peculiari pattuizioni.

“FORO COMPETENTE”

Per qualsiasi controversia nascente dall'esecuzione o comunque connessa col presente contratto è esclusivamente competente il foro di Bergamo.

TYPES, TIPS AND HINTS

THE CORRECT WAY TO HANDLE ELECTRICALLY OPERATED LOCKS

- 1) **MOUNTING:** the models are basically prepared to be mounted with the bolt running on horizontal axis. For vertical mounting (downwards or upwards striking), the specific model has to be required.
- 2) **OPERATING POWER "DIRECT CURRENT":** use strictly the voltage value rated on product tag: 12Vdc or 24Vdc (according with the model) with tolerance $\pm 10\%$ (D.C. rectified voltage particularly for TRONIX version is required). Power consumption level must be considered according with the models (see pertinent data sheet). For electrical drop bolts, in any case, never use alternative voltage.
Note: Before to connect the electrical lock (door strike) or electromagnet, to any type of electronic equipment (e.g. access control system etc.) it is necessary to provide a protection with a diode (for exp 1N4005) in parallel with the coil and respect the polarity + - ; or varistor (for exp CNR07D180L or similar) can be used.
- 3) **APPLICATION:** the electrical drop bolt has to be fixed and/or fitted into pertinent frame hole, after only that the proper place is prepared in advance and any work on the door is ultimately concluded. Never proceed with working (drilling, milling, welding, etc.) with electrical lock near your work. Must be considered that the electrical drop bolt should be "magnetised" and consequently the metallic filings and grinding dust could be attracted into the mechanism producing damages and functional failures.
- 4) **ADJUSTMENT:** tolerances and door alignments must be respected to provide the bolt of electrical lock running freely without any friction and/or obstruction; the bolt has to be virtually in condition to move itself "in air", as the "axial" movement energy (to close and open the door) is really suited to the task, but it is not capable to overcome tangential pressure and/or push on the door.
It is a matter of fact that common sense and all days practice teaches us how do never push on the door in the instant of the electrical release action because on the contrary the electrical lock should stop in blocking condition. In addition, during the installation be sure that the bolt when entirely projected (door locking position) is inserted into the corresponding hole of locking counter plate at least 4/5 of its length; to be capable to offer the proper locking resistance and meanwhile to avoid overloads that should be impressively amplified by "lever effect" if the charge pushing of the door is concentrated on the bolt-tip. This setting is "imperative" to avoid malfunctions and irreparable damages of the electrical drop bolt.
In other words, the distance between the fixing flange of the lock and the corresponding strike plate has to be no more than 5mm (3mm is preferable). If for some technical reasons, it is not possible to reduce the tolerance between the door and door-post (frame), you can arrange compensation using two or more locking counter-plates superposed (one over the other) to provide the bolt to "plunge" into the locking hole.
- 5) **CLEANING:** the cleaning of the electrical lock (bolt and annexed assembly) must be made periodically according with ambient situations.
- 6) **FREE OF OILING:** the bolt of electrical lock operates on self lubricating precision bearing. Never use greasing, oiling and so on into the bolt mechanism of the electrical lock could form grease lumps itself capable to block the movement of the bolt and/or impair the correct function. If it is necessary to clean, a proper detergent solvent could be used (specific silicon spray ALLSILICON Allegretti or similar).
- 7) **OUTDOOR INSTALLATION:** in outdoor installation the problem of humidity is secondary in comparison with the dregs produced by water and dirt.
Really the factor is the calcareous accumulate around the bolt of electrical lock that can injury the correct movement. All possible precautions have to be taken consequently before to consider the application.

For any reasons it is not authorized, unfasten the assembly screws of the locks (electrical bolts, door strikes etc.), because all the factory setting should be compromised and operating malfunctions occur.
Take case the above informations too and proceed accordingly to avoid any warranty expiration.

ELECTRONIC SECURITY SYSTEMS AND EQUIPMENT

for single and/or interlocking door management systems

All TECNODIMENSIONE devices are also available
in “FLEXICON” technology to interface
with any control unit such as PLC, microprocessor boards
or conventional electronic boards even for pre-existent systems

ELECTROMAGNETS

**PROFESSIONAL
ELECTRICAL LOCKS**

Introduction to the choice of Professional electrical drop bolts

The entire range of Tecnodimensione professional electrical drop bolts has been designed and built to provide the widest possible range of resistance and to fit the space available on the frame.

The various models are available for:

- high resistance doors
- medium resistance doors
- doors with low-profile frames
- sliding doors
- automatic/motorised doors

Type of mounting:

- recessed
- surface mounted

Functional purposes:

- **Fail-Secure** = 'security' version, i.e. the door will lock if power is lost.
To be used when the door is used for intrusion protection.
- **Fail-Safe** = 'anti-panic' version, i.e. opens in the event of a voltage drop.
To be used where the door is also used as an escape route.

Power supply:

- low voltage 12Vdc/24Vdc

EXAMPLE OF MAXILOCK AXIAL PIN ELECTRICAL DROP BOLT

The example shown is generic to all models in the range

UNIVERSAL OPERATING VOLTAGE

either 12 or 24Vdc
field programmable

BOBINA 100% ED

100% ED for continuous
duty, high grading "H class"
copper coil for high
temperature 220° Celsius

EXTRA CURRENT PROTECTIONS

suppressor coil noise
on-board (varistor limited
at 27Vdc)

BUILT IN MICROSWTCH

bolt status sensor
with SPDT dry
contacts rated 1A

REGOPLUS®

magnet to active the coincident
reed contact (fitted up with
REGOPLUS® special holder)

ROUND LOCKING PIN

AISI 316 stainless steel heavy
duty solid bolt, operates on self
lubricating precision bearing

REGOPLUS®

adjustable reed contact
to monitor the open/
closed status of the door
(changeover SPDT dry
contact rated up to 0,9A)

SCREW TERMINALS

for fast wiring
connections

Serie Bluelock®, it is the electrical drop bolt recognizable immediately by brilliant anodized blue color of aluminium parts.

"Fail-secure" version, normally closed model (fail-closed). The head of the bolt is "PROJECTED" (door open) in case of power lack on the coil is absent.

È la versione utilizzata quando la porta è usata anche come chiusura antintrusione.

Serie Redlock® it is the electrical drop bolt recognizable immediately by brilliant anodized bright red color of aluminium parts.

"Fail-safe" version, normally open model (fail-open). The head of the bolt is "RETRACTED" (door open) in case of power lack on the coil.

È la versione utilizzata quando la porta è usata anche come passaggio di fuga (per es. in caso di incendio).

ELECTRICAL DROP BOLT APPLICATION EXAMPLES

with various types for surface or recessed mounting

MAXILOCK or **MEDILOCK** inserted in middle rail of the door.

VERTILOCK embedded in the vertical doorpost or recessed in the counterframe.

VERTILOCK for surface mounting on the doorpost or the counterframe.

RAMLOCK embedded in the counterframe of the vertical upright of a sliding door.

MINILOCK or **MICROLOCK** embedded in the top rail of a sliding or automatic/motorised door frame.

MINILOCK 'invisibly' recessed in doors, windows, cupboards, etc.

MICROLOCK in 'Clean Cover' housing surface mounted on the door.

MINILOCK visible for roller shutters and blinds

MICROLOCK 'invisible recessed' for drawers.

ELECTRICAL DROP BOLTS INTELLIGENT

MAXILOCK, MEDILOCK, VERTILOCK & MINILOCK TRONIX VERSION

ideal for access control systems

General

The TRONIX version of the micromodule is a true ultra-miniaturised SMD technology 'micro control unit' encapsulated in an anodised anticorodal aluminium micro-block measuring just 83x30x16mm deep!

It is the 'brain' that all Tecnodimensione electrical drop bolt models are designed to be equipped with, simply by integrating it into the body.

Existing drop bolts and those already in operation can also be fitted with the smart TRONIX Version.

This gives the installer a great opportunity to upgrade their systems and offer their customers significant improvements. With the 'TRONIX version micromodule', retrofitting can be carried out almost instantly, requiring virtually no modification to the Tecnodimensione Redlock® (fail-safe) and BlueLock® (fail-secure) series electrical drop bolts.

The entire range of Tecnodimensione's 300 types of electrical drop bolts are now available in the 'TRONIX version', in types and sizes:

MAXILOCK, MEDILOCK, VERTILOCK, MINILOCK.

With the TRONIX Version, each Tecnodimensione electrical drop bolt is actually a compact stand-alone electrical drop bolt with 'decentralised intelligence' that is 'self-managing' with its own opening times, self-closing, permanent lock/unlock, etc.

All it needs is a 12Vdc (24Vdc) power supply and it is ready to use with maximum safety. It receives the opening command from the local door release button and/or the remote command from intercoms, console keypads, remote controls, code keypads, magnetic card readers etc. without the need for an interface.

To convert the RAMLOCK electrical drop bolt to the smart version, use the TRONIX micromodule, purchased separately Mod. 035952

APPLICATION EXAMPLES FOR THE MANAGEMENT OF SINGLE AND/OR INTERLOCKING DOORS

USING TRONIX VERSION MAXILOCK, MEDILOCK & VERTILOCK INTERCONNECTED FOR INTERLOCKING USE

Innovative performance

In addition to the proven performance of Tecnodimensione's electrical drop bolts, the new 'smart' electrical drop bolts offer the following additional innovative features:

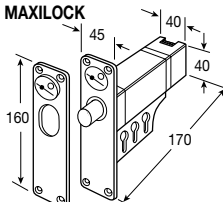

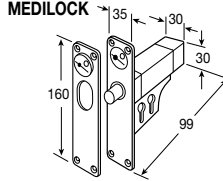

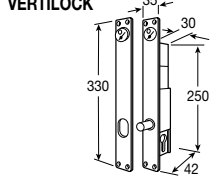

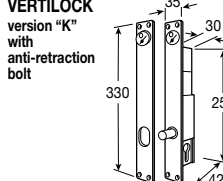

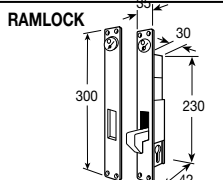

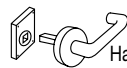

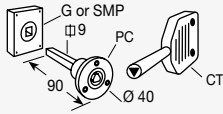

- timing:**
 (door opening release time).
 No more doors that are accidentally left open due to a wrong movement or distraction! The command impulse unlocks the door for a pre-set time (3 - 25 sec.), allowing it to be opened. When the time has elapsed, the door is locked, even if it has not been opened, preventing unauthorised access.
- temporary unlimited unlocking:**
 (unlocked) allows the door to be permanently unlocked for cleaning services, removals, etc. or in the event of fire.
- bolt exit control:**
 after the door has been opened by an authorised opening command, the bolt of the solenoid lock remains retracted until the door is closed again.
- debounce logic:**
 the door then closes again softly!
 The exit of the bolt is controlled by a special 'debounce' logic to compensate for unwanted oscillations or rebounds. In this way, the classic 'pump type door closer' can complete its stroke without encountering any resistance, thus closing the door completely.
- courtesy service:**
 even if the door is unlocked manually with a key (and/or internal handle), the internal electronic management keeps the solenoid lock pin temporarily retracted for the programmed release time, even if the key is not any more inserted. This allows you to put away your key, push open the door and walk through, even when your hands are full (carrying parcels, luggage, etc.).
- tamper protection:**
 when the door is closed, attempts at tampering or forced activation, the proximity contact will not cause the bolt to retract, meaning that the door cannot be opened maliciously with blades, magnets or by tampering with the door alignment sensor.
- outputs for remote information:**
 - 2 outputs respectively for door status + bolt position; suitable for signalling door open/closed (to connect remote optical and acoustic signals and SLIM-DUALUX Stop/Go displays etc.).
- interlink** (for future 2 door interlocking):
 the TRONIX version is already equipped with an input/output control circuit, so that when connected in 'tandem' with another TRONIX unit you can easily create a 2 door interlocking system.

ANCILLARIES												
Adaptors to unlock the door by means of the handle - Ideal to enable Maxi, Medi and Vertilock electrical drop bolts to be manually released also by means of a handle and/or safety bar. For Maxilock or Medilock: installing the additional standard "G" adaptor (where is placed the key-hole), enables the door to be unlocked from the "inside" by means of the handle and/or safety bar. The door can be manually unlocked also from the "outside" by means of the cylinder with key. For Vertilock: the special "G" and/or "SMP" adaptor is fixed on the body of Vertilock by engaging the bolt of the handle/panic bar (or using the PC + CT kit).												
OPTIONAL "G" ADAPTOR Standard or "SMP"  Handle to be provided by customer	 9 mm square follower for release by handle or panic bar	(30/50/70) Key-holes backse	applicable on MAXILOCK MEDILOCK	R	Version "G" for temporary manual unlocking			S00708GU "G" adaptor only				
		25 Key-holes backse	applicable on VERTILOCK	R	Version "G" for temporary manual unlocking			S00908GU "G" adaptor only				
		25 Key-holes backse	applicable on VERTILOCK	---	Version "SMP" for permanent manual unlocking			S00908GSMP "SMP" adaptor only				
Kit with PC control pin + CT triangular key 	SPECIAL APPLICATIONS: Emergency unlocking with standard triangular key Kit with PC control spindle, guide and rose for the insertion of the triangular key + 2 TC plastic triangular keys for emergency unlocking (if the electrical drop bolts are fitted with the optional "G" and/or "SMP" adapter).								S00908GT2 (kit PC + CT)			

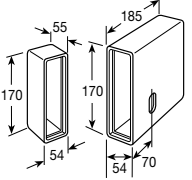

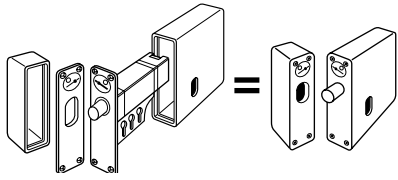

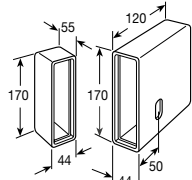

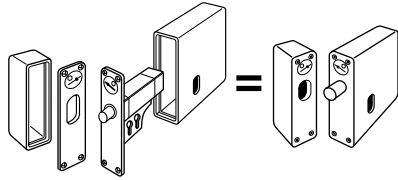

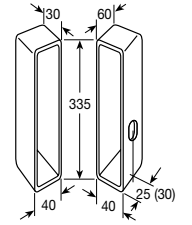

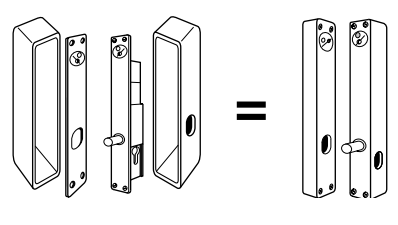

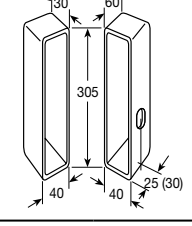

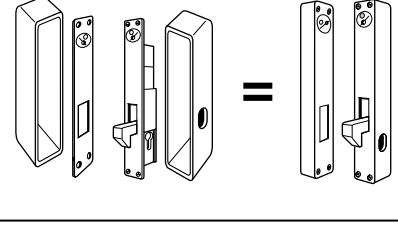

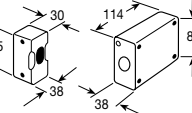

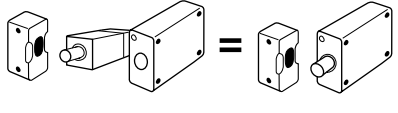

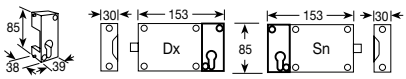

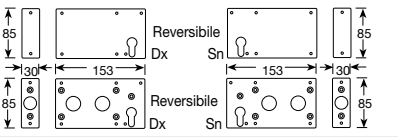

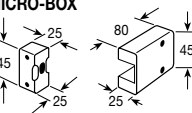

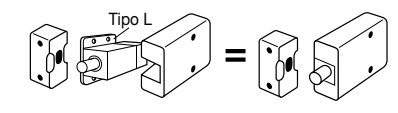

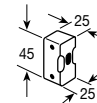

Note: for Maxilock or Medilock without override mechanism, above corresponding price less euro 71,00 each. The published prices do not include key-cylinders, handles, and any adapter, installing ancillary. The standard locking counter-plate is included, but special "2 slide-guide" counter-plates for swing doors should be purchased separately.

PROFESSIONAL
ELECTRICAL LOCKS

Introduction to the choice of Professional Electric Door Strikes

The entire range of Tecnodimensione range professional electric door strikes has been designed and built to provide the widest possible range of resistance and to fit the space available on the frame.

Allows you to 'electrically control' the locking of any door fitted with a simple fixed knob (instead of a handle) and a traditional mechanical lock

The various models are available for:

- standard wooden or metal doors
- security doors with multi-bolt locking
- doors with low profile frames
- for panic bars

Versions for any environment:

- CLASSIC - for normal environments
- WATERPROOF - for outdoor applications
- GREENTRONIX - intelligent with multifunction microcip
- FIRE - with fire resistant REI 90

Mounting types:

- built-in
- surface
- **Fail-Secure** = 'security' version, i.e. the door will lock if power is lost.
To be used when the door is used for intrusion protection.
- **Fail-Safe** = 'anti-panic' version, i.e. opens in the event of a voltage drop.
To be used where the door is also used as an escape route.

Power supply:

- low voltage 12Vdc/24Vdc, low consumption

GLOSSARY

PROFESSIONAL ELECTRICAL DROP BOLTS TECNODIMENSIONE

for recessing into the door frame

Electric strikes are a revolutionary idea that makes it possible to 'electrically control' the locking of any door that is simply fitted with a fixed knob (instead of a handle) and a standard mechanical latch.

Essentially, the operating criterion of the ordinary electric lock is reversed: it is not the lock that is electric, but the striker plate in the door frame (where the latch is wedged), known in the trade as the 'striker', that is electric.

The electric strike is therefore essentially an electric door opener, with a striker mounted on the jamb (which matches the lock mounted on the door). Another major advantage is that the power cable runs inside the door frame, where the electric strike itself is permanently mounted, and is not subject to wear and tear as the door moves.

Advantages and performance:

- **DOOR STRIKE WITH ELECTRICALLY OPERATED SPRING BOLT MECHANISM:**

allows you to electrically control the locking of any door without replacing the existing mechanical lock.

- **2Vdc or 24Vdc POWER SUPPLY WITH ULTRA LOW POWER CONSUMPTION:**

for direct connection to any access control door opener system, interlocks, etc.

- **COIL FOR 100% UNINTERRUPTED OPERATION AND PERMANENT POWER SUPPLY:**

even continuous locking and unlocking without the risk of coil burnout.

The TECNODIMENSIONE electric door strike with special coil (heavy duty) also accepts permanent voltage.

- **POWERED "FAIL-SECURE" SECURITY VERSION:**

this is the powered 'security' version, i.e. the door unlocks when power is applied.

The door can be opened for as long as the opening control provides power to the electric strike.

As soon as the power supply is interrupted, even if the door is not opened, it will automatically lock again, preventing further access.

- **FAIL-SAFE' 'ANTI-PANIC' VERSION THAT UNLOCKS IF POWER IS LOST:**

this is the 'anti-panic' version that unlocks if power is lost. This is the special version to be used when the door is also used as an emergency exit.

The unlock command is obtained by removing the power supply. As soon as the power supply is restored, the door returns to the locked state.

- **MONITORING SENSORS:**

Most of the Tecnodimensione electric door strikes can be equipped with an intrinsic sensor to check the door status (open/closed) consisting of an SPDT micro-contact that checks the penetration of the spring bolt.

- **FRONT PLATE WITH VARIOUS CONFIGURATIONS TO ALLOW CONNECTION TO STANDARD LOCKS:**

stainless steel, anodised aluminium, painted metal depending on model
Short plate (C) for latch only locks
Long plate (L) with slot for passage of the deadbolt, for latch + deadbolt locks.

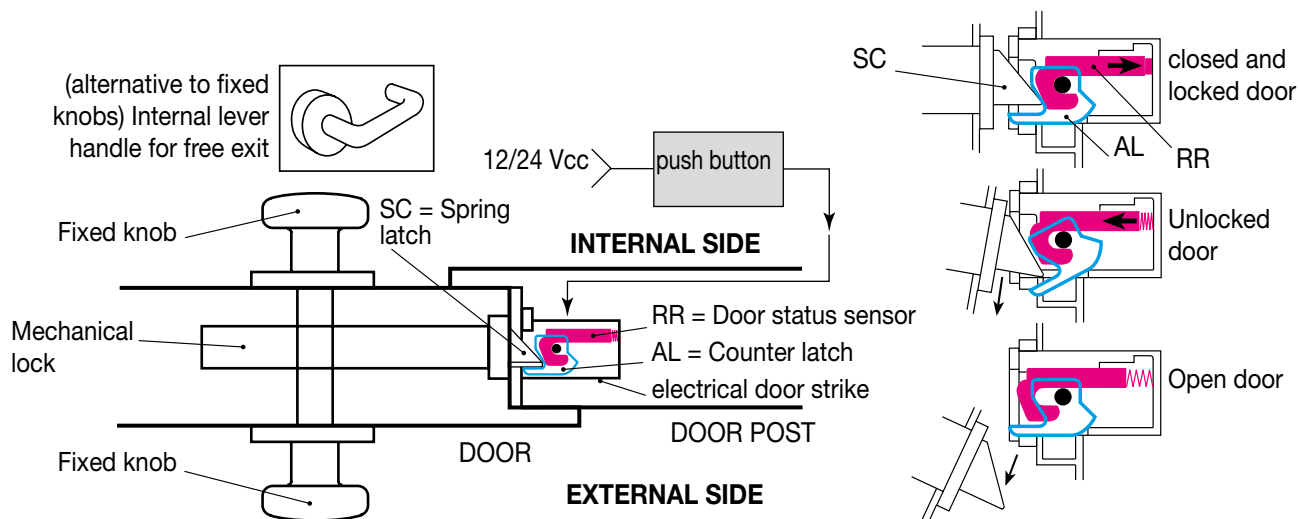

Corner versions with rounded edges.

- **WIDE RANGE OF SIZES:**

for all types of wooden, iron, aluminium, security doors, with panic bars, etc.

Electric doors strike/lock coupling

Examples of applications for recess mounting

Examples of applications for intallation surface mount

Electrical door strikes **NEWSLIM Series** *ONE SERIES... 1000 SOLUTIONS*

Ideal for a wide variety of applications...
... and it can be either recess-mounted or surface-mounted.

THEY ARE AVAILABLE IN 4 VERSIONS SUITABLE FOR ANY ENVIRONMENT

recess-mount version

example of **NEWSLIM** electrical door strike assembled with long front plate Lp ready to be recess-mounted on any type of door

surface-mount version in "CLEAN COVER" housing

example of **NEWSLIM** electrical door strike assembled in the housing **BLINDO-DOORSTRIKE** ready for easy surface mount installation, without having to make recesses in the frame, for any type of door, even existing ones

NEWSLIM CLASSIC
version for
normal
environments

NEWSLIM WATERPROOF
waterproof version
for outdoor
applications

NEWSLIM GREENTRONIX
'intelligent' operation
with multifunction
microchip

NEWSLIM FIRE
fire resistant version
REI 90

NEWSLIM Series electrical door strike **RECESS-MOUNT VERSION**

*Here are the 4 versions
suitable for any environment*

the traditional *NEWSLIM* electric door strike...

NEWSLIM CLASSIC

version for normal
environments.

Suitable for applications
on doors of various types
and materials.

NEWSLIM WATERPROOF

waterproof version for
outdoor applications.

Fitted with IP68 rated
terminal blocks and
electrical connections.

NEWSLIM GREENTRONIX

'intelligent' operation
with multifunction
microchip:

-  anti-preload,
-  energy saving,
-  anti-coil heating.

REI 90

NEWSLIM FIRE

fire resistant
version REI 90.

For use on smoke
and
fire doors.

...and the *NEWSLIM* No Cut version with spring latch guide

which does not require a lateral cut
on the frame, which remains intact.
When it can be mounted further back
and more centrally on the door post
frame.

Also available in 4 versions

NEW SLIM Series CLASSIC electrical door strike Traditional Version

Version for normal environments.

For recess mounting to be combined with specific front plates. (see page 40)

NEWSLIM WATERPROOF No Cut version with latch guide

Ideal for door frames in which a lateral cut for housing the electrical strike cannot be made.

"IP68" waterproof version for outdoor applications.

Ultra-slim: max 19 mm

body only with 2 impregnated flying leads (without RR sensor)

BODIES OF ELECTRIC DOOR STRIKES

The "Waterproof" No Cut with latch guide' version is also suitable for outdoor installations and gates.

Ultra-slim, mini-symmetrical and ultra-compact body of just 19 mm.

Designed to be recess mounted on door frames with even small cross-sections.

Possibility of controlling the door remotely (see models with RR sensor).

The 'IP68' rating refers to the parts of electrical connections with impregnated flying leads (the moving parts of the mechanisms are IP54 protected).

The No Cut version, thanks to the latch guide, is ideal when it is possible to mount it further back and more centrally on the door post frame to avoid having to make a lateral cut for housing the electric strike, and which therefore remains intact (without cutting).

body only with 2 impregnated flying leads (without RR sensor)

body only with 5 impregnated flying leads (with RR sensor)

010J25X(D/S)

Cod. 010J27RX = Cp = short flat front plate with sharp edges.
Example of application for 'latch only' lock (without deadbolt).

Cod. 010J28RX = Cpt = short flat front plate with rounded edges.
Example of application for 'latch only' lock (without deadbolt).

Cod. 010J29RX = Lp = long flat front plate with sharp edges.
Example of application for 'spring latch' and 'deadbolt' lock.

Cod. 010J30RX = Lpt = long flat front plate with rounded edges.
Example of application for 'spring latch' and 'deadbolt' lock.

Cod. 010J23X(D/S) = Lps = long extra thickness front.
Example of application for 'spring latch' and 'deadbolt' lock.

Cod. 010J25X(D/S) = La = long angular front plate with rounded edges.
Example of application for 'Spring latch' and 'deadbolt' lock.

THE TRADITION CONTINUA... *with the same high quality as always!* professional electrical door strikes

Series PRO

High resistance Electric Door Strikes with a resistance of up to 1,000 kg distributed over the door surface. Ideal for electrically controlling medium-heavy doors with the option of remote door control.

Series SIM

Mini-symmetrical Electric Door Strikes. Ideal for electrically controlling room doors in hotels, residences, offices, etc. with electronic opening control.

Series NEWARCUS

Electric Door Strikes with curved body ideal for electrically controlling the opening of security doors equipped with mechanical latch locks with multiple round deadbolts.

Series PA

Electric Door Strikes for panic bars to be applied, with external mechanism with a 'curved' crescent shaped spring latch. Ideal for 'electrically controlling' panic bar doors that can only be opened from the outside by authorised persons.

Series PRO - Professional electrical door strikes

Export Product-list - January 2024

													MODELS		
FIRE PRO for fire doors  Standard body only  Body + front plate	This advanced model of series PRO electrical door strikes is specifically designed for REI120 fire doors, that are designed to withstand fire for a maximum of 120 minutes, to provide a high pressure resistance a maximum up to of 1000 kg (10KNw). The final certification of the door is the responsibility of the door manufacturer, who does this by means of an 'incorporation' procedure for the various components mounted on the door.

Note: the body of FIRE PRO electrical door strikes is compatible with all the front plate used for series PRO electrical door strikes.															
FRONT PLATES (for the bodies of electrical door strikes, customisable according to the lock)													EXAMPLE OF APPLICATION		
													Series FIRE PRO electrical drop strikes are compliant with standards UNI-EN634-1 RF120. They are suitable for REI 120 fire doors and are virtually able to withstand temperatures up to 1150 °c for 2 hours. They also have a high pressure resistance and can tolerate pressures up to 1000 kg (10 KNw).

MODELS

Series SIM

Series SIM electrical door strikes are the ideal solution to electrical locking of the doors of hotel, residence and office rooms, etc. using electronic opening command by badge readers or other types of readers, access control systems and/or numerical keypads and/or remote push-button panels, intercoms, etc.

SERIES NEW ULTRA

Series NEW ULTRA
extreme resistance

Standard body only

Body only with RR sensor

Body + Long front plate

It is the advanced version of the conventional series SIM mini-symmetrical electrical door strike. Despite its ultra-small size, it offers the following two advantages:

- a) High pressure resistance up to 2000 kg (20 KNw)
b) Also available with RR sensor to control the door status.

It is the ideal solution for applications that require a higher resistance (up to 2000 kg).

SLIM-DOORSTRIKE with mini spring bolt

For conventional mounting

EXAMPLE OF RECESS-MOUNTING ON THE DOOR FRAME

SLIM-DOORSTRIKE electrical door strikes for recess-mounting.

Fail-secure version (security) = powered release.

If there is no power, the SLIM DOORSTRIKE closes to prevent unauthorized access.

Fail-safe version (antipanic) = release without power.

If there is a fire in case of power latch, the SLIM DOORSTRIKE releases automatically to enable a safe evacuation.

Models for 12 Vdc power supply

SLIM-DOORSTRIKE electrical door strike for conventional mount and screw terminal board for conventional connection to any system, even pre-existent.

Fail-secure version with powered release.

- With 100% ED reel for uninterrupted functioning.
- RR microswitch sensor controlling the door status
- Adjustable counter latch
- 12 Vdc/280 mA power supply

Supplied with flat front plate in stainless steel.

SLIM-DOORSTRIKE fail-safe version (antipanic).
Same as above but releases in event of power latch.

Models for 24Vdc power supply

SLIM-DOORSTRIKE fail-secure version (security).
Same as above but with 24VDC/140 mA power supply.**SLIM-DOORSTRIKE fail-safe version (antipanic).**
Same as above but with 24VDC/140 mA of power latch.

Accessory (optional)

Mini spring bolt for recess-mounting with adjustable spring bolt.

Body with recess-mounting flange in anodised machined aluminium with a "silver" finish. Self-lubricating spring bolt in acetalic resin with stroke adjustable from 5 to 12 mm.

BLINDO-DOORSTRIKE

with key override for manual release

'CLEAN COVER' armored housing for easy surface mounting
of all **NEWSLIM** series professional electrical door strikes.

Innovative solution for immediate installation to all types of door, even pre-existing ones.

No cutting the frame
no work on internal frame
grain!

Only a portable drill is needed
to easily install **DRILL&GO**
devices on any frame.

That's it, and your door is safely
powered.

No more open doors!

FOR EASY SURFACE MOUNT
INSTALLATION OF **NEWSLIM** SERIES
ELECTRIC DOOR STRIKES

THE ELECTRIC LOCKING SYSTEM OF YOUR ENTRANCE CAN BE INSTALLED STRAIGHT AWAY

A simple non-removable installation using concealed screws is all that's needed!

All you have to do is install the two elements of the BLINDO-DOORSTRIKE, machined from solid anodised aluminium, to any door, entrance or gate, even pre-existing ones, to have an elegant and 'Clean Cover' armored housing.

The BLINDO-DOORSTRIKE electric locking system is easy, fast and extremely safe to install.

Thanks to its design, it cannot be removed from the outside.

It is the ideal solution in factories, industries, companies, laboratories, offices, public bodies, professional firms, shops, apartment buildings and private homes, wherever remote electric opening via push-buttons, intercoms etc. is required, as well as for entrances that are opened by badges, biometric and/or digital code readers.

If you also require an alarm, a version of the BLINDO-DOORSTRIKE is available complete with RR sensor for remote door status monitoring, open or closed.

With the addition of our SLIM-HANDTRONIX module, full professional door management can be implemented, with various timing and monitoring options (see page 92).

TECNODIMENSIONE
security with style

NEW BLINDO-DOORSTRIKE secure 'CLEAN COVER' housing

for converting the New SLIM Series Electrical Strikes into a surface-mount version
with 4 versions suitable for any environment

NEWSLIM CLASSIC

version for normal environments.
Suitable for applications on doors of various types and materials.

NEWSLIM WATERPROOF

waterproof version for outdoor applications.
Fitted with IP68 rated terminal blocks and electrical connections.

NEWSLIM GREENTRONIX

'intelligent' operation with multifunction microchip:
anti-preload, energy saving, anti-coil heating.

NEWSLIM FIRE

fire resistant version
REI 90.
For use on smoke and fire doors.

Here's the 'NEWSLIM' version incorporated into the strike block of the **BLINDO-DOORSTRIKE** housing for easy surface mount installation on any type of door even pre-existing ones, without having to make holes or recesses!

IDEAL FOR EVEN THE MOST VARIED ENVIRONMENTAL CONDITIONS

BLINDO-DOORSTRIKE with key override manual release

'CLEAN COVER' housing for easy surface mounting of professional electrical door strikes

innovation

Innovative solution that allows all **NEWSLIM*** series professional electric door strike to be installed directly on any type of door, even pre-existing ones

One unit..
for **4** different needs.

**DRILL&
GO**
Cut-Free®

- 1st** Surface mount for direct installation on any type of door without having to make recesses or modifications to the internal framework of the door. All you need is a drill and a screwdriver
= **DRILL& GO CUT-FREE**
- 2nd** Elegant ultra-robust housing, in satin finish anticorodal anodised aluminium machined from solid. Lock with incorporated OT58 chromed brass spring latch, machined from solid, with additional key release mechanism ♦
= **BLINDO CLEAN-COVER**
- 3rd** Non-removable: no visible screws, cannot be removed from the outside = **SECURBLOCK**
- 4th** Two models for installation on any type of door, even pre-existing ones: for opening to the right or left, by pulling or pushing
= **DUPLOFIX**

EXAMPLE OF PULL TO EXIT DOOR (usual case)

**Type
TD1**
for right-hand
inward
opening
door

**Type
TS2**
for left-hand
inward
opening
door

EXAMPLE OF PUSH TO EXIT DOOR (infrequent)

**Type
SD3**
for right-hand
outward
opening
door

**Type
SS4**
for left-hand
outward
opening
door

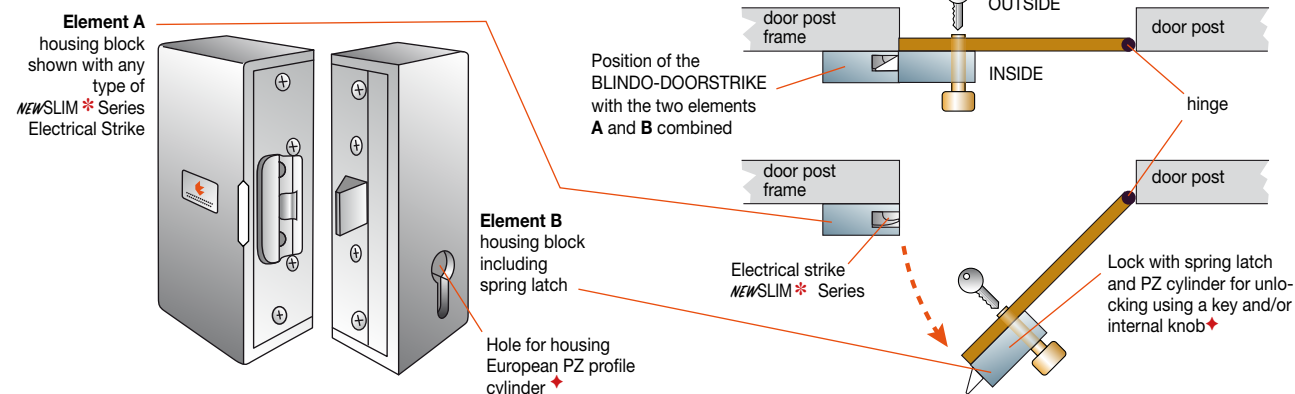

* Note 1: The **NEWSLIM** series electrical strike to be inserted in **element A** should be chosen according to technical requirements (see the models in our SECURITY price list).

♦ Note 2: To allow the door to be opened manually too, use a key/key or key/knob type European PZ profile cylinder of any make or model. The length should be chosen according to the thickness of the leaf of the door. The cylinder has to be purchased separately by the installer.

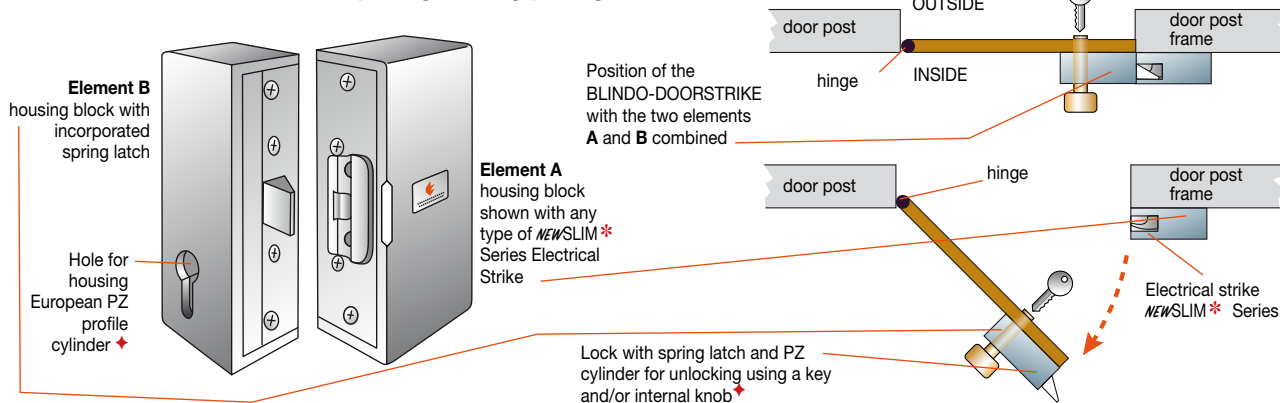

BLINDO-DOORSTRIKE with key override manual release

'CLEAN COVER' armored housing for easy surface mounting of **NEWSLIM** series professional electrical door strikes. How to install the housing according to the direction in which the door opens - installation inside the protected area.

Type TD1 for right-hand inward opening door by pulling

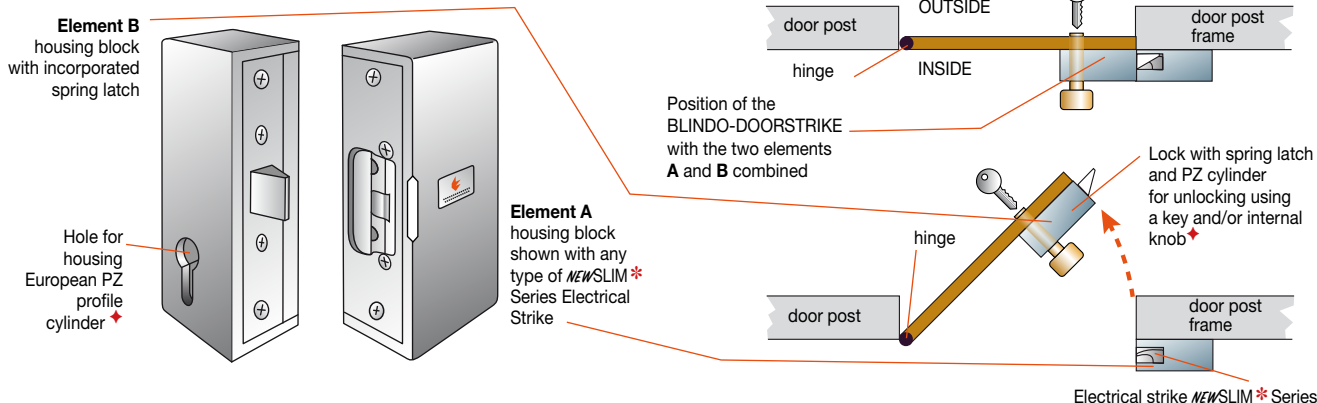

Type TS2 for left-hand inward opening door by pulling

Type SD3 for right-hand outwards opening door by pushing

Typ SS4 for left-hand outwards opening door by pushing

* Note 1: The **NEWSLIM** series electrical strike to be inserted in **element A** should be chosen according to technical requirements (see the models in our **SECURITY** price list).

♦ Note 2: To allow the door to be opened manually too, use a key/key or key/knob type European PZ profile cylinder of any make or model. The length should be chosen according to the thickness of the leaf of the door. The cylinder has to be purchased separately by the installer.

BLINDO-DOORSTRIKE

with key override manual release

'CLEAN COVER' armored housing
for easy surface mounting
of all *NEWSLI* Series Electrical door strikes

Elegant and ultra-robust housing in anodised satin finish aluminium machined from solid. Designed for surface mounting, can be installed easily without having to cut and/or make recesses on any type of door = DRILL&GO.

Element 'A' exploded view

housing block, shown with *NEWSLI* Series electric strike installed (the chosen model) and the mounting bracket to fasten to the door post frame

Element 'B' exploded view

housing block, including the mounting bracket complete with spring latch to install on the leaf of the door

Screw type terminal board for connecting
NEWSLI (standard model) = first 2 terminals
NEWSLI (model with RR sensor) = 5 terminals

+	power supply
-	12 VDC (24 VDC)
NC	from door status
NO	sensor (NC when door is closed)
C	

Step 1: assemble element 'B', to install on the leaf of the door, in the following order:

- Correspondence with the hole for the passage of the PZ cylinder. Fix it in place using four suitable **FS** screws.
- Install the housing (5) that covers the lock by inserting the two pins in the corresponding holes. Assemble everything using the two **VP** screws that secure the pins of the housing and join the two components together.
- Lastly, insert the PZ cylinder and secure it using the **VC** screw, according to the type.

Step 2: assemble element 'A' to install on the door post frame, in the following order:

- Position the bracket (1) so that the alignment arrow coincides with the arrow of the lock of element 'B'.
- Fasten the bracket (1) to the door post frame using the three **FS** screws.
- Insert the body of the electrical strike (3) into the window of the bracket. Then assemble everything using the two **SDS** screws to join the two components together.
- Install the housing (2) that covers the bracket (1) and secure it using the two **AS** screws.

Note:

- AS** = 2 assembly screws (supplied)
SDS = 2 screws for electrical door strike (supplied)
VP = 2 screws to secure the two pins of the housing to the lock (supplied)
FS = 7 (3+4) fixing and fastening screws, length and type according to the type of door (not supplied)
VC = screws supplied with the cylinder (not supplied)

ATTENTION:
for overall dimensions see on the next page

NEWBLINDO-DOORSTRIKE

with key override manual release

Secure "Clean Cover" armored housing for inserting the NEWSLIM Series Traditional Electric Strike.

Select the version for the 4 environments.

NEWSLIM CLASSIC

NEWSLIM WATERPROOF

NEWSLIM GREENTRONIX

REI 90
NEWSLIM FIRE

NEWBLINDO-DOORSTRIKE is an elegant and ultra-robust housing in anodised satin finish aluminium machined from solid. Designed for easy surface mounting, can be installed easily without having to cut and/or make recesses on any type of door = DRILL&GO.

Non-removable 'CLEAN COVER' armored housing with no visible screws, cannot be removed from the outside. Kit consisting of two elements A and B.

element 'A': is the housing block designed to contain the NEWSLIM * Series electric strike.

element 'B': is the housing block incorporating the OT58 chromed brass spring latch, machined from solid. With hole for inserting the PZ cylinder for manual release.

- Dimensions 130 x 49 x 38 mm (for each block)

- Overall weight 1 kg (excluding electric strike and cylinder)

* Note 1: The SLIM series electric strike to be inserted in element A should be chosen according to requirements

♦ Nota 2: For mechanical opening, use a key/key or key/knob type PZ cylinder of any make or model. The length should be chosen according to the thickness of the leaf of the door. The cylinder has to be purchased separately.

Nota 3: For timer and monitoring functions see Handtronix in the SECURITY price list.

for pull-open doors

0158J14SCM
for push-open doors

PROCEDURE FOR INSTALLING THE BLINDO ELECTRIC DOOR STRIKE IN AKEYLESS 'CLEAN COVER' HOUSING

"A" element exploded view

Housing protective "CLEAN COVER" which includes mini spring bolt (to be mounted on door)

"B" element exploded view

Housing protective "CLEAN COVER" which includes electrical door strike (to be mounted on door-post)

Example of one door complete with doorstrike
CLEANCOVER-DOORSTRIKE unit finally mounted

Assembly sequence for element "A"

to be mounted on door frame:

- secure the bracket (1) on the door with the two FS fixing screws
- Insert the protective housing (2) to cover the bracket (1).
- insert the mini spring bolt (3) in the hole in the bracket and assembly all parts with the two supplied pass-through AS screws that link all the three parts together.

Assembly sequence for element "B"

to be mounted on door-post frame:

- secure the bracket (4) on the door-post with three FS fastening screws.
- secure the electrical door strike body (5) with the two SDS screws supplied with the bracket (4).
- insert the protective housing (6) to cover the bracket (4) with electrical door strike (5) and connect all parts with the two AS supplied pass-through screws that link all the three parts together.

Note:

AS = 4 assembly screws

SDS = 2 screws for electrical door strike supplied together.

FS = 5 fixing and fastening screws on frame should be provided by installer (based on type of frame).

**PROFESSIONAL
ELECTRICAL LOCKS**

Introduction to the choice of Mini electromagnets multipurpose

The entire range of Tecnodimensione's professional electromagnets is designed and built to meet the most demanding 'electromagnetic lockout' requirements.

The types of mini-electromagnets are intended for:

- Applications on structures designed keep specific doors closed. Not necessarily to provide extreme resistance to attempted break-in, but whose purpose is that of monitoring to prevent forced entry and to discourage misuse, diversions or damage to access doors. Doors through which unauthorised persons must not pass (e.g. emergency exits, classified areas such as sterile rooms, hospital wards with problematic patient areas, etc.). At the same time, these controlled doors can be opened and unlocked without jamming in the event of a hazard, fire, etc., becoming safe passageways or escape routes with automatic panic release in the event of a power failure.

- Very small, compact and elegantly designed. They achieve their goal of being 'the electromagnetic locking block' with the lowest aesthetic impact on the door structure compared to conventional electromagnets available on the market.

- Two holding functions: front anchoring with 'magnetic adhesion' or recessed with 'shear locking'.

- Functional purposes: 'Fail-Safe' automatic anti-panic and crush safe.

- Power supply: 12Vdc/7mA (very low consumption unit).

- External protection: with anodised monobloc aluminium 'Clean Cover' protective housing machined from solid, for easy, non-removable surface mounting with no visible screws.

MINI ELECTROMAGNETS MULTIPURPOSE

2 types available

FOR EASY
SURFACE MOUNT
INSTALLATION

Slim Minisentrylock Series in "CLEAN COVER" housing

FRONT LOCKING

Front mounted mini-electromagnets with magnetic adhesion.

Frontal anchorage is achieved by magnetic adhesion between the face of the electromagnet and the face of the counter plate.

In practice, when the door is aligned in the stop moulding, the two coplanar surfaces fit together perfectly and a magnetic hold is established between them (with a powered holding electromagnet).

Key features:

- Fail-Safe: emergency unlock even in the event of a fault (release in the event of a power failure).
- Crush-safe: the unlock door command works even if pressure is applied to the door (e.g. crowds of people).
- Monitoring: fitted with a sensor to indicate door status (closed/open).

Slim Shearlock Series in "CLEAN COVER" housing

SHEAR LOCKING

Recessed shear-locking mini-electromagnets.

The shear anchoring is obtained by means of 2 stainless steel pins (located at the ends of the face of the electromagnet) which fit into the 2 correspondingly shaped seats (indentations) on the face of the floating counter plate.

In practice, when the door is aligned in the stop moulding, the electromagnet (when energised) attracts the face of the floating counter plate, which, when raised, aligns with the corresponding face of the electromagnet.

This causes the 2 stainless steel interlock with it. In this case, the high resistance shear locking is by recessed mounting.

Key features:

- Fail-Safe: emergency unlock even in the event of a fault (release in the event of a power failure).
- Resistance: is greatly increased (compared to simple magnetic adhesion) due to the magnetic interlocking of the two stainless steel pins.
- Monitoring: fitted with a sensor to indicate door status (closed/open)

SLIM-PASSGUARD

Unified module because....

A full SLIM & MODULAR range of devices with different functions, operations and purposes (stop and go displays, entryphones, keypads, such as code keypads, badge readers and micro stop and go display control units of the same series...) designed and made keeping a single module of the same size for all as a base element.

In fact, all the devices have the same appearance, size and modularity to be interchangeable and housed in the same unified chasing of the previous lock.

Convertible because...

Using unified flanges, cases and boxes, any unified SLIM & MODULAR device is convertible into 5 different types that can be installed in any way, next to the door, based on the assembly needs found in the field.

Assembly type

1

fully aligned concealed
for recess-mounting
without flange
on the same plane of
the door frame panel

Door frame

Unified body of modular device recess mounted set flush into surface door frame level

Assembly type

2

fully aligned at milling
for recess-mounting
with front flange
on the same plane
of the panel surface

Wall panel

Unified body of modular device with front flange

Assembly type

3

for conventional flush mounting
with front flange
overlapping door frame

Door frame

Flange overlapping door frame

Unified body of modular device with conventional front flange

Assembly type

4

for surface mounting with using housing

Surface housing

Door frame

Unified body of modular device included in housing

Assembly type

5

for recessed wall-mounting with flange and wall-mounting receptacle

Raceway

Wall-mounting receptacle

Flange overlapping the wall and fixed to wall mounting receptacle

Unified body of modular device with front flange and wall mounting receptacle

Clamping wings

Wall

Convertible unified module.

Basic reference for construction of each SLIM & MODULAR device.

5 devices with **5** different functions, in a single unified convertible module.

Stop/go display SLIM-DUALUX

The stop and go display is a device with a red/green light and international STOP/GO symbols designed to regulate transit in various controlled entrances. It has a manual pressure button for opening the door and/or ringing the bell.

Stop/go sensorized display SLIM-DUALUX No-touch

This is the stop and go display (instead of the manual pressure button) with an infrared sensor that "sees" a presence up to 10 cm away. The "contactless" door-opening command and/or bell works automatically by bringing the hand close without touching anything.

Push-button unit SLIM-DUALPUSH

It is the keypad device with 2 independent multi-functional buttons that activates the specific command, using its various exist contacts pressed manually, according to the programme.

Emergency "mushroom" button SLIM-HELPPUSH

It is the red "mushroom" button to be pressed manually to unlock partly and/or fully the doors, to stop processing cycles, to set off fire, emergency alarms etc.

Intercom SLIM-DUALVOX

The talk-listen unit is the device that, when matched to another identical unit, in tandem and/or in multiples (with special Voxtronix centralisation module), allows voice intercommunication between different remote stations. The "Push&Call" button activates the start of the conversation in "alternated listen and answer mode". The two-colour LED (red/green) signals the current "Listen/Talk" status.

All convertible into **5** different types of installation next to the door.

Assembly type

1

fully aligned concealed for recess-mounting without flange on the same plane of the door frame panel

Assembly type

2

fully aligned at milling for recess-mounting with front flange on the same plane of the panel surface

Assembly type

3

for conventional flush mounting with front flange overlapping door frame

Assembly type

4

for surface mounting with using housing

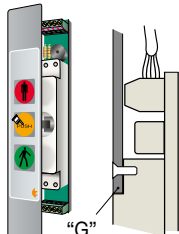

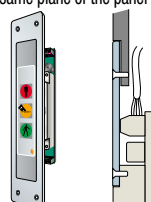

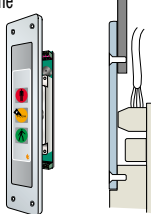

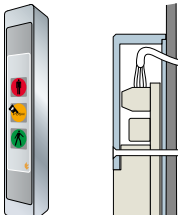

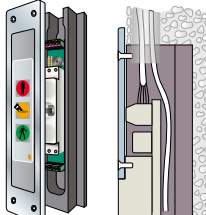

Assembly type

5

for recessed wall-mounting with flange and wall-mounting receptacle

Models for 12Vdc/70mA power supply

MODELS

Assembly type 1 fully aligned concealed for recess-mounting without flange on the same plane of the door frame panel * 	SLIM-DUALUX No-touch stop and go display type 1 with fully aligned concealed for recess-mounting on the same plane of the door frame panel without flange. Ideal to achieve a "smooth" surface (without roughness) that is easy to clean. Supplied with diffuser screen and gap G for sections with a thickness of 1.6 mm. Complete with self-adhesive cover designed to be applied after the final installation of the system. * In this case it is advisable to prepare the recess during the door frame machining.	034981HM2U		
Assembly type 2 fully aligned at milling for recess-mounting with front flange on the same plane of the panel surface ♦ 	SLIM-DUALUX No-touch stop and go display type 2 for aligned recessed flush fitting in bottom of panel using front flange (e.g. To mount on wall panel next to the door frame on the post where no chasing can be carried out). Supplied with front flange in anodized aluminium with "silver" finish - 250 x 50 mm, thickness 2.5 mm for recess-mounting on the same plane of the panel surface for aligned recessed flush fitting in bottom of plane using front flange. Cover pre-assembled and fixed into the flange niche. ♦ In this case, it is advisable to prepare sunk milling during the panel machining phase.	034981HM2U3		
Assembly type 3 for conventional flush mounting with front flange overlapping door frame 	SLIM-DUALUX No-touch stop and go display type 3 for traditional recessed fitting using flange. Supplied with front flange in anodized aluminium with "silver" finish - 250 x 50mm, thickness 4 mm for flush mounting. Cover pre-assembled and fixed into the flange niche. Mounting can be carried out "on site", directly onto the installed door frame.	034983HM2U		
Assembly type 4 for surface mounting with using housing 	SLIM-DUALUX No-touch stop and go display type 4 for mounting placed on surface using housing. With extra-strong protective housing, made in anodized silver finish aluminium (35 x 25 x 215 mm). Self-adhesive cover in polycarbonate, provided separately and designed to be used as final cover to hide the 4 fixing screws of the housing on the door frame. Useful when you wish to avoid recess-mounting or cuts on the door frame.	034984HM2U		
Assembly type 5 for recessed wall-mounting with flange and wall-mounting receptacle 	SLIM-DUALUX No-touch stop and go display type 5 for recessed assembly using flange and wall box. Supplied with front flange in anodized aluminium with "silver" finish - 250 x 50 mm, thickness 4 mm, to be fixed to the housing by placing on wall surface. Self-adhesive cover in polycarbonate pre-assembled and fixed into the flange niche. Also fitted with wall box with "wings" for rapid anchoring (65 x 30 x 230 mm), in plastic taken from single block to be assembled "in a niche" in the wall to house the body of the stop and go display No-touch. Wall niche and cable channel to be prepared beforehand.	034983HM2U		

Special configurations available at extra charge: Cover with your logo and/or customized.

MUSHROOM BUTTON FUNCTIONING

CONNECTION DIAGRAM valid for all 5 types

VOXTRONIX

Talk-listen intercommunication system
with alternated listen and answer mode using the “push&call” mode.

TECNODIMENSIONE
security with style

Microprocessor based **VOXTRONIX** PROFESSIONAL TECNODIMENSIONE INTERCOM CONTROL MODULE

An interface that controls the alternating intercom communications system using "push&call" button. It houses the amplification and volume adjustment circuits; it controls two A and B channels which must be connected to two SLIM-DUALVOX intercoms respectively.

One unit
for **2** different needs

1st It can be instantly programmed
thanks to the Jumpers = **MULTISELECT**

2nd It has a modular configuration that can be expanded
in "cascade" for intercom points or multiple of
2...4...8...12 intercom points without limitations = **EXPANDER**

PERFECT FOR INTERCOMMUNICATION
BETWEEN THE VISITOR AND INTERNAL OPERATOR.

1st
MULTISELECT

Microprocessor-based VOXTRONIX interface with two channels, to manage 2 SLIM-DUALVOX intercom units.

Tecnodimensione systems can be immediately adapted to all plants, depending on their configuration, both during commissioning and after start-up.

As it does not require changes to the module or the installation of new connection lines, it is the ideal solution to meet current and future customers' needs.

It is in fact sufficient to use the Jumpers integrated in the module to immediately select the required program.

VOXTRONIX can be programmed in several modes because ...

...it's **MULTISELECT!**

2nd
EXPANDER

VOXTRONIX base configuration is made up of 1 two-channel "VOXTRONIX" control interface connected to two "SLIM-DUALVOX" intercoms to create the ideal application for Passbox structures or two isolated rooms.

VOXTRONIX in basic configuration

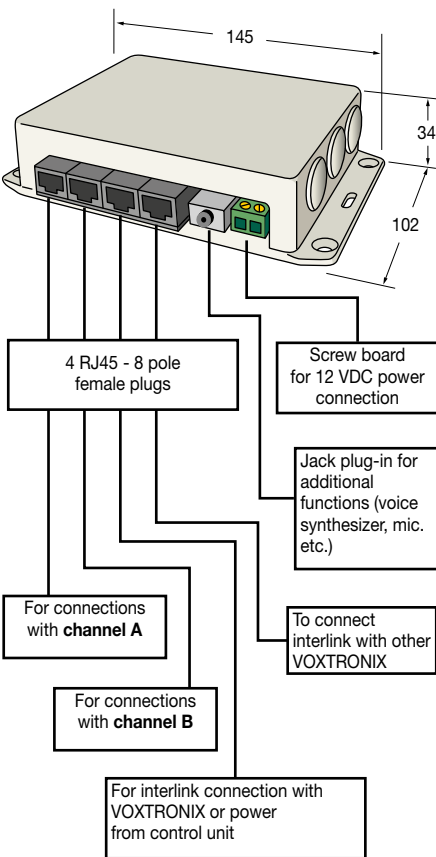

VOXTRONIX is designed to allow the configuration in "cascade" of multiple communication systems

of 2... 4... 8... 12 intercom points without limitations.

By connecting a two channels VOXTRONIX module to the subsequent ones, it is possible to flexibly set-up a multiple intercom system; in this way the communication of any one single point of the system should be listen, contemporarily to all other points and consequently the replays too...

VOXTRONIX in multiple configuration

<div>Two-channel VOXTRONIX (expandable)</div> <div></div>	<div>INTERCOM CONTROL MODULE</div> <div>VOXTRONIX</div> <div>with RJ45-8 pole quick plug for easy installation and quick wiring</div> <div>An interface that controls the alternating intercom communications system using “push&call” button. It houses the amplification and volume adjustment circuits; it controls two A and B channels which must be connected to two SLIM-DUALVOX intercoms respectively.</div> <div>“Multiselect”, multi-programmable version. Furthermore, the “Expander” version, which can be expanded connecting 2 or more VOXTRONIX modules in cascade to immediately create multiple intercom systems for 2, 4, 6, 8 and more rooms. Ideal for clean rooms.</div> <div>2-channel models (12V DC power)</div> <div>Two-channel VOXTRONIX intercom module with microprocessor to control 2 SLIM-DUALVOX (see page 56) intercom used by 2 people in two different rooms in tandem, in the base configuration. With “Multiselect” multi-programmable logic. “Expander” type can be expanded in “Multi-voxtronix” configuration for multiple rooms with several people in different points for alternated communications in a single phone conference (see selectable programs and configuration example below). “CLICK & GO” technology with RJ45 8-pole female quick plugs. Compact shock-proof plastic case (dimensions 145 x 102 x 34 mm). With 2 screw terminals for 12 VDC connection to a separate power supply (or directly to the PHARMATRONIX unit).</div>	<div>Export Product-list</div> <div>January 2024</div> <div></div> <div>TECNODIMENSIONE®</div> <table><tr><th>Ordering information</th><th>Q.ty</th></tr><tr><th>MODELS</th><th>N°</th></tr><tr><td></td><td></td></tr><tr><td>034968H2W2U</td><td></td></tr><tr><td>* Module only. SELECTABLE PROGRAMS (with jumpers): Sound options: on/off warning beep.
Function options: “courtesy” function = automatic communication opening up to 6 seconds or “standard” function = open communication for as long as “push&call” button is held down.

IMPLEMENTATIONS: Increase sound power by additional external speaker to be connected to the SLIM-DUALVOX unit (see specific documentation). Centralised female mic jack (i.e.: star) for general and simultaneous communications to all intercoms in the various separate rooms (or alternating) for connections with additional “voice synthesizers” to automatically send pre-recorded messages and warnings (on request).

CONFIGURATION EXAMPLES

Fig. 1 - BASE configuration for two intercom points

The Tecnodimensione base configuration intercom system is made up of 1 two-channel "VOXTRONIX" control interface connected to two "SLIM-DUALVOX" intercoms to create the ideal application for Passbox structures or two isolated rooms. In fact, two operators in two different rooms can easily communicate reciprocal warnings and voice confirmations with this connection (alternating communications by pressing the "push&call" button).

Fig. 1 - Voxtronix BASE configuration

Fig. 2 - "MULTI-VOXTRONIX" configuration for 4, 6, 8 or more intercom points

The Tecnodimensione "VOXTRONIX" system is already set to become a "multiple" intercom system for more than two channels, even 4, 6, 8 or more. Essentially, the "Multi-voxtronix" multiple system is easy to create by interconnecting identical "sister" VOXTRONIX unites to the first two-channel "base" VOXTRONIX interface in cascade via interlink. With this configuration, "Multi-voxtronix" allows several people in remote points to list or communicate in alternation in a single phone conference with fast service communications. In this way the communication of any one single point of the system should be listen, contemporarily to all other points and consequently the replays too.

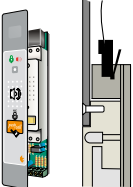

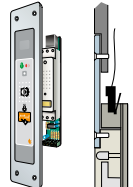

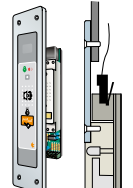

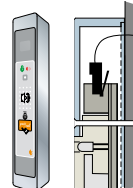

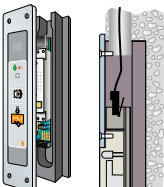

Fig. 2 - Voxtronix MULTIPLE configuration

<p>Assembly type 1 fully aligned concealed for recess-mounting without flange on the same plane of the door frame panel *</p> 	<p>SLIM-DUALVOX speak-listen unit type 1 with fully aligned concealed for recess-mounting on the same plane of the door frame panel without flange. Ideal to achieve a surface (without roughness) that is easy to clean. Supplied with front panel and gap G for sections with a thickness of 1.6 mm. Complete with self-adhesive cover designed to be applied after the final installation of the system.</p> <p>* In this case it is advisable to prepare the recess during the door frame machining.</p>	<p>034961CW2U</p> <p>* Module only. Other components are needed for operation, see page 76 and page 79.</p>
<p>Assembly type 2 fully aligned at milling for recess-mounting with front flange on the same plane of the panel surface ◆</p> 	<p>SLIM-DUALVOX speak-listen unit type 2 for aligned recessed flush fitting in bottom of panel using front flange (e.g. To mount on wall panel next to the door frame on the post where no chasing can be carried out).</p> <p>Supplied with front flange in anodized aluminium with "silver" finish - 250 x 50 mm, thickness 2.5 mm for recess-mounting on the same plane of the panel surface for aligned recessed flush fitting in bottom of plane using front flange. Cover pre-assembled and fixed into the flange niche.</p> <p>◆ In this case, it is advisable to prepare sunk milling during the panel machining phase.</p>	<p>034962CW2U</p> <p>* Module only. Other components are needed for operation, see page 76 and page 79..</p>
<p>Assembly type 3 for conventional flush mounting with front flange overlapping door frame</p> 	<p>SLIM-DUALVOX speak-listen unit type 3 for traditional recessed fitting using flange. Supplied with front flange in anodized aluminium with “silver” finish - 250 x 50mm, thickness 4 mm for flush mounting. Cover pre-assembled and fixed into the flange niche.</p> <p>Mounting can be carried out "on site", directly onto the installed door frame.</p>	<p>034963CW2U</p> <p>* Module only. Other components are needed for operation, see page 76 and page 79.</p>
<p>Assembly type 4 for surface mounting with using housing</p> 	<p>SLIM-DUALVOX speak-listen unit type 4 for mounting placed on surface using housing. With extra-strong protective housing, made in anodized silver finish aluminium (35 x 25 x 215 mm). Self-adhesive cover in polycarbonate, provided separately and designed to be used as final cover to hide the 4 fixing screws of the housing on the door frame.</p> <p>Useful when you wish to avoid recess-mounting or cuts on the door frame.</p>	<p>034964CW2U</p> <p>* Module only. Other components are needed for operation, see page 76 and page 79.</p>
<p>Assembly type 5 for recessed wall-mounting with flange and wall-mounting receptacle</p> 	<p>SLIM-DUALVOX speak-listen unit type 5 for recessed assembly using flange and wall box. Supplied with front flange in anodized aluminium with “silver” finish - 250 x 50 mm, thickness 4 mm, to be fixed to the housing by placing on wall surface. Self-adhesive cover in polycarbonate pre-assembled and fixed into the flange niche. Also fitted with wall box with “wings” for rapid anchoring (65 x 30 x 230 mm), in plastic taken from single block to be assembled “in a niche” in the wall to house the body of the speak-listen unit.</p> <p>Wall niche and cable channel to be prepared beforehand.</p>	<p>034963CW2U</p> <p>* Module only. Other components are needed for operation, see page 76 and page 79.</p>
<p>Noise-proof power SPEAKER (Ø 150 mm) for noisy environments to connect to the screw-on terminal of the SLIM-DUALVOX listen-speak unit.</p>		<p>034969MST4 (opzionale)</p>

Special configurations available at extra charge: Cover with your logo and/or customized.

For sizes, measurements and details of chasing, application examples and connection diagrams, see page 78.

SLIM-DUALVOX INTERCOM UNIT - sizes, application examples and connection diagram

Assembly type ① total alignment, lock recessed into surface without flange

Assembly type ② alignment at bottom with front flange "flush with surface" at bottom

Assembly type ③ traditional fitting with front flange over the lock

Assembly type ④ for mounting placed on surface using housing

Assembly type ⑤ for recessed wall mounting with flange and wall box

security with style

FLAT-DUALUX ultra-slim

PROFESSIONAL TECNODIMENSIONE STOP/GO DISPLAYS

with green/red lights and international STOP/GO symbols to control traffic, built-in push button and remote buzzer. Kit made up of stop/go display, connection cable and "FLEXICON" converter.

One unit..
for **4** different needs.

1st Conventional wiring installation with screw-type terminal board via converter = **FLEXICON**

2nd No frame cutting nor work on internal nervures. Just drill to install = **DRILL&GO CUT-FREE**

3rd ultra-slim, bendable, virtually "without thickness" (just 1 mm!) for fully-aligned installation self-adhesive on any smooth frame surface with even shaped and narrow profiles = **FLAT**

4th "smooth" sealed alignment to the frame surface fully proper detergent washable = **CLEAN**

PERFECT FOR SMOOTH ULTRA-SLIM DOOR FRAMES

FLAT-DUALUX ultra-flat, practically "without thickness" (just 1 mm!) it can be applied to even very narrow profiles, its "fully-aligned" mount is almost immediate, installable on site without having to make any cuts since it does not require any room-to recess! It is virtually a "thin" electronic, self-adhesive and bendable sticker that lays and adapts to surfaces not necessarily plane as long as they are smooth and suitable to self-adhere...
... it's **FLAT!**

1st
flexicon
MULTIFUNCTIONAL
INPUTS/OUTPUTS

Ideal for the installation on existing door frames in combination with conventional wiring systems and to be interfaced with any control unit such as PLC, microprocessor boards or conventional electronics....

... it's **FLEXICON!**

2nd
CUT-FREE

No frame cutting nor work on internal nervures!
Just drill a simple Ø 14 mm round hole on the support surface to insert the retro-concealed electrical connection cable...
... it's **CUT-FREE**

4th
CLEAN

FLAT-DUALUX self-adhesive installation "flush-aligned" is smooth and roughness-free ... easily cleanable with any proper detergent...
... it's **CLEAN!**

PROFESSIONAL STOP/GO DISPLAYS

FLAT-DUALUX ultra-slim

Complete with connection cable and FLEXICON converter for conventional wiring with screw terminal board

Type **6** - "FULLY ALIGNED"

ultra-slim for self-adhesive installation (without frame cutting).

Type **7** - "FLUSH"

with support flange for installation on uneven surfaces.

A SINGLE UNIT FOR 2 TYPES OF UNIVERSAL INSTALLATION

Type **6**

"FULLY-ALIGNED"

ultra-slim for self-adhesive installation on smooth surfaces without cutting the frame.

No cutting or work on the internal frame nervures

compatible smooth surfaces

1 stop/go display with flat surface

2 stop/go displays with flat surfaces

1 stop/go display with slightly concave surface*

1 stop/go display with slightly convex surface*

*to be checked case by case

Kit 1 for one door - for example "pass box"

composed of:

- n. 1 FLAT-DUALUX stop/go display (type 6 or 7)
- n. 1 joint cable
- n. 1 "FLEXICON" converter

Any control board (PLC, etc.) (not included in the Kit)

4 wires for traditional cable (not included in the Kit)

Kit 2 for one door - for example "interlocking system"

composed of:

- n. 2 FLAT-DUALUX stop/go displays (type 6 or 7)
- n. 2 joint cables
- n. 1 "FLEXICON" converter

Any control board (PLC, etc.) (not included in the Kit)

4 wires for traditional cable (not included in the Kit)

Type **7** on the "SAME PLANE" with ultra-slim support flange for wall or frame mount with uneven surfaces

FLAT-DUALUX STOP/GO DISPLAY COMPLETE WITH FLANGE

4 wires for traditional cable (not included in the Kit)

Example of FLAT-DUALUX stop/go display application complete with support flange even for uneven rough surfaces

Assembly type 1 fully aligned concealed for recess-mounting without flange on the same plane of the door frame panel * 	SLIM-CODEGUARD access code keypad type 1 with fully aligned concealed for recess-mounting on the same plane of the door frame panel without flange. Ideal to achieve a "smooth" surface (without roughness) that is easy to clean. Supplied with diffuser screen and gap G for sections with a thickness of 1.6 mm. Complete with self-adhesive cover designed to be applied after the final installation of the system. * In this case it is advisable to prepare the recess during the door frame machining.	034991NM2U	
	Same with front panel and gap G for sections with a thickness of 3 mm.	034991NM2U3	
Assembly type 2 fully aligned at milling for recess-mounting with front flange on the same plane of the panel surface ♦ 	SLIM-CODEGUARD access code keypad type 2 for aligned recessed flush fitting in bottom of panel using front flange (e.g. To mount on wall panel next to the door frame on the post where no chasing can be carried out). Supplied with front flange in anodized aluminium with "silver" finish, 250 x 50 mm, thickness 2.5 mm for recess-mounting on the same plane of the panel surface for aligned recessed flush fitting in bottom of plane using front flange. Cover pre-assembled and fixed into the flange niche. ♦ In this case, it is advisable to prepare sunk milling during the panel machining phase.	034992NM2U	
Assembly type 3 for conventional flush mounting with front flange overlapping door frame 	SLIM-CODEGUARD access code keypad type 3 for traditional recessed fitting using flange. Supplied with front flange in anodized aluminium with "silver" finish - 250 x 50 mm, thickness 4 mm for flush mounting. Cover pre-assembled and fixed into the flange niche. Mounting can be carried out "on site", directly onto the installed door frame.	034993NM2U	
Assembly type 4 for surface mounting with using housing 	SLIM-CODEGUARD access code keypad type 4 for mounting placed on surface using housing. With extra-strong protective housing, made in anodized silver finish aluminium (35 x 25 x 215 mm). Self-adhesive cover in polycarbonate, provided separately and designed to be used as final cover to hide the 4 fixing screws of the housing on the door frame. Useful when you wish to avoid recess-mounting or cuts on the door frame.	034994NM2U	
Assembly type 5 for recessed wall-mounting with flange and wall-mounting receptacle 	SLIM-CODEGUARD access code keypad type 5 for recessed assembly using flange and wall box. Supplied with front flange in anodized aluminium with "silver" finish - 250 x 50 mm, thickness 4 mm, to be fixed to the housing by placing on wall surface. Self-adhesive cover in polycarbonate pre-assembled and fixed into the flange niche. Also fitted with wall box with "wings" for rapid anchoring (65 x 30 x 230 mm), in plastic taken from single block to be assembled "in a niche" in the wall to house the body of the access code keypad. Wall niche and cable channel to be prepared beforehand.	034995NM2U	

Special configurations available at extra charge: Cover with your logo and/or customized.

The diagram illustrates the Slim-Codeguard system components and their connections. On the left, a "Screw" type terminal board is shown with four terminals. Wires connect these terminals to an "Electrical lock coil, max 1A/12VDC" and a "power supply 12 VDC". A note specifies that the terminal board is suitable for any system but should not be used for Wirex - Click & Go cabling. On the right, a vertical door frame is shown with an "Entry side of the door" indicated by an arrow. The "SLIM-CODEGUARD" system is mounted on the door frame, including a "Keypad" and a "Female plug (do not use)". A note at the top right states: "Use a 4 lead cable each for conventional wiring".

Assembly type ⑤ for recessed wall mounting with flange and wall box

CONNECTION DIAGRAM valid for all 5 types

SLIM-HANDTRONIX no touch TECNODIMENSIONE PROFESSIONAL "STAND ALONE" UNIT FOR AUTONOMOUS MANAGEMENT OF EACH DOOR

This unit is not simply "No-touch sensorized Stop/Go display" but actually micro stand-alone unit designed to fully control one single door equipped with electrical lock.

One unit for... **5** different needs...

- 1st** Timed unlocking command with automatic re-locking
- 2nd** Debounce logic
- 3rd** Tamper protection
- 4th** Optical and/or acoustic signals
- 5th** Temporary unlimited release

YOUR ENTRY INTO YOUR HOUSE OR APARTMENT
BLOCK IS ALWAYS PROTECTED AND CONTROLLED.

1st

TIMED OPENING WITH AUTOMATIC RE-CLOSURE (time required to authorise the door opening)

No more doors left open accidentally due to wrong movement or distraction! Control switch (with entryphone button, foyer door opening button, code keypad and/or badge, etc.) brings about release for a pre-set amount of time that can be adjusted as required (1-8-20-60 sec) enough to allow transit opening the door. Once the time has elapsed, the door is then locked, even if it has not been opened, and prevents any unauthorised entrance.

2st

DEBOUNCE LOGIC

Finally, a gentle door closing mechanism! After the door has been opened by an authorised opening command, the electrical solenoid bolt stays back so that the door is does not slam back. The pin is also released by a special debounce logic to compensate for undesired bounce or oscillations. In this way, the classic "door closer with pump" can complete its route without any resistance to win and then close the door completely.

Lastly, thanks to the "courtesy service", for manual release of the door using the key (and/or internal handle) the solenoid bolt pin stays back temporarily for the programmed release time even with the key not inserted. This allows you to put away your key, push the door and pass through it even with your hands full (transit with parcels, bags, etc.).

3rd

TAMPER PROTECTION

When in stand-by the door is locked, the unit supervises the door-proximity sensor against the tamper aiming to switch its own contacts. In other words, in stand-by condition, the locking of the bolt is not affected by interruption or alteration of the magnetic field of the reed sensor.

4th

OPTICAL AND/OR ACOUSTIC ALARMS

These signals report if there is a problem with the door. The built-in buzzer activates and the lights of the Stop/Go display flash to signal the following conditions:

- If the door after an authorized transit stays open over a preset time (time-out adjustable 30 sec).
- Every opening obtained unlikely through breaking effraction gives an automatic immediate alarm output. Really the opening of the door is permitted electrically using only authorized command arrived by badge readair for example.

5th

TEMPORARY UNLIMITED RELEASE

This feature enables to permanently unlock the door for cleaning, moving and other purposes, or in the event of fire. It is possible to open the door an unlimited number of times without having to activate the command on the solenoid bolt for each passage.

SLIM-HANDTRONIX no touch

STAND ALONE UNIT FOR THE MANAGEMENT OF SINGLE DOORS

This unit is not simply "No-touch sensorized Stop/Go display" but actually micro stand-alone unit designed to fully control one single door equipped with electrical lock.

This unit provides the following innovative features:

- **Temporization:** timed unlocking command - setttable as desired (1-8-20-60 sec.) When the interval ends the door lock re-locks itself automatically, even if the door isn't open, thus preventing unauthorised intrusions.
- **Temporary unlimited unlocking (door locked in open position):** this feature enables to permanently unlock the door for cleaning and other purposes.
- **Temporary unlocking:** (open unlatched) - In case of maintenance, cleaning, moving, etc., the door can be set "open unlatched", only by using the key command, which allows an unlimited number of door openings without the electrical lock be operated after each passage.

Electric striker: the wing returns to lock position as soon as the door is opened to avoid debounce when being closed.

- **Tamper protection:** When in stand-by the door is locked, the unit supervises the door-proximity sensor against the tamper aiming to switch its own contacts. In other words, in stand-by condition, the locking of the bolt is not affected by interruption or alteration of the magnetic field of the reed sensor.
- **Optical and/or acoustic alarms:** These signals report if there is a problem with the door. The built-in buzzer activates and the lights of the Stop/Go display flash to signal the following conditions:
 - If the door after an authorized transit stays open over a preset time (time-out adjustable 30 sec).
 - Every opening obtained unlikely through breaking effraction gives an automatic immediate alarm output. Really the opening of the door is permitted electrically using only authorized command arrived by badge readir for example. - 12 Vdc/120 mA power supply.

Assembly type 1

fully aligned concealed for recess-mounting without flange on the same plane of the door frame panel *

SLIM-HANDTRONIX stand alone unit type 1 with fully aligned concealed for recess-mounting on the same plane of the door frame panel without flange.

Ideal to achieve a "smooth" surface (without roughness) that is easy to clean.

Supplied with diffuser screen and gap G for sections with a thickness of 1.6 mm.

Fitted (instead of the manual push button) with an infrared sensor that "sees" a presence up to 10 cm away. Basically, the "contactless" door opening and/or doorbell command is automatically triggered by bringing the hand close to the unit, without actually touching it. Complete with self-adhesive cover designed to be applied after the final installation of the system.

*** In this case it is advisable to prepare the recess during the door frame machining.**

034991HM

Same with front panel and gap G for sections with a thickness of 3 mm

034991HM3

Assembly type 2

fully aligned at milling for recess-mounting with front flange on the same plane of the panel surface ♦

SLIM-HANDTRONIX stand alone unit type 2 for aligned recessed flush fitting in bottom of panel using front flange (e.g. To mount on wall panel next to the door frame on the post where no chasing can be carried out). Fitted (instead of the manual push button) with an infrared sensor that "sees" a presence up to 10 cm away. Basically, the "contactless" door opening and/or doorbell command is automatically triggered by bringing the hand close to the unit, without actually touching it. Supplied with front flange in anodized aluminium with "silver" finish - 250 x 50 mm, thickness 2.5 mm for recess-mounting on the same plane of the panel surface for aligned recessed flush fitting in bottom of plane using front flange. Cover pre-assembled and fixed into the flange niche.

♦ In this case, it is advisable to prepare sunk milling during the panel machining phase.

034992HM

Assembly type 3

for conventional flush mounting with front flange overlapping door frame

SLIM-HANDTRONIX stand alone unit, type 3 for traditional recessed fitting using flange.

Supplied with front flange in anodized aluminium with "silver" finish - 250 x 50mm, thickness 4 mm for flush mounting.

Fitted (instead of the manual push button) with an infrared sensor that "sees" a presence up to 10 cm away.

Basically, the "contactless" door opening and/or doorbell command is automatically triggered by bringing the hand close to the unit, without actually touching it.

Cover pre-assembled and fixed into the flange niche.

Mounting can be carried out "on site", directly onto the installed door frame.

034993HM

Assembly type 4

for surface mounting with using housing

SLIM-HANDTRONIX stand alone unit type 4 for mounting placed on surface using housing. With extra-strong protective housing, made in anodized silver finish aluminium (35 x 25 x 215 mm).

Fitted (instead of the manual push button) with an infrared sensor that "sees" a presence up to 10 cm away.

Basically, the "contactless" door opening and/or doorbell command is automatically triggered by bringing the hand close to the unit, without actually touching it.

Self-adhesive cover in polycarbonate, provided separately and designed to be used as final cover to hide the 4 fixing screws of the housing on the door frame.

Useful when you wish to avoid recess-mounting or cuts on the door frame.

034994HM

Assembly type 5

for recessed wall-mounting with flange and wall-mounting receptacle

SLIM-HANDTRONIX stand alone unit type 5 for recessed assembly using flange and wall box. Supplied with front flange in anodized aluminium with "silver" finish - 250 x 50 mm, thickness 4 mm, to be fixed to the housing by placing on wall surface.

Self-adhesive cover in polycarbonate pre-assembled and fixed into the flange niche.

Fitted (instead of the manual push button) with an infrared sensor that "sees" a presence up to 10 cm away.

Basically, the "contactless" door opening and/or doorbell command is automatically triggered by bringing the hand close to the unit, without actually touching it.

Also fitted with wall box with "wings" for rapid anchoring (65 x 30 x 230 mm), in plastic taken from single block to be assembled "in a niche" in the wall to house the body of the standalone unit.

Wall niche and cable channel to be prepared beforehand.

034995HM

Special configurations available at extra charge: Cover with your logo and/or customized.

Ideal for orderly grouping and compacting of all incoming and outgoing system wires in a single terminal box. Furthermore, specific slots let you professionally add on diodes, resistances, etc., when needed, by welding. It comes complete with protection and insulation cover to avoid direct contacts. Specific slots in the cover permit all types of fixtures. Overall cover dimensions 50 x 25 x 20.</p>		031501		
	<p>2-module DUAL-TERMINALS element same as the above but with 12 input and 12 mirrored output terminals. Overall cover dimensions 100 x 25 x 20.</p>		031502		
	<p>3-module DUAL-TERMINALS element same as the above but with 18 input and 18 mirrored output terminals. Overall cover dimensions 150 x 25 x 20.</p>		031503		

BRICKYDESK DESKTOP CONSOLES FOR DOORS MANAGEMENT									Export Product-list January 2024  TECNODIMENSIONE®

MICRORELEX "MULTIFUNCTIONAL" MINIATURE RELAY MODULES													Export Product-list January 2024		
TECHNICAL CHARACTERISTICS Multipurpose modules, microboard execution with screw terminals for fast wiring connections. Ideal as auxiliary actuators, interface for existing installations.	SINGLE UNIT MODULE	DOUBLE UNIT MODULE	FOR FLUSH MOUNTING into frame	SURFACE MOUNTING with black aluminum housing	"PRINT CIRCUIT" EXECUTION (without box)	OPERATING VOLTAGE Vdc	POWER CONSUMPTION mA	1 AMPLIFIED RELAY activation by "low level" signal - 5 mA/12V P = with positive input + N = with negative input -	1 AUTOCONTROLLED RELAY activation with variable signal from 8 up to 12Vac (alternative voltage)	2 PROGRAMMABLE RELAYS - each stand-alone (separated inputs) - tandem (common input command)	1 TEMPORIZED RELAY (adjustable 1 ÷ 60 sec) programmable	CONTACT OUTPUTS changeover SPDT - 1A/12V	 TECNODIMENSIONE®		
	Ordering information 												Q.ty		
	MODELS												N°		
MICRORELEX R1 "pcb"  Bricky execution R1  Bricky execution R1A 	It is a small relay unit with amplified input circuit to be driven by any low level signal (either positive or negative 12Vdc). Execution and dimensions like single unit Bricky module.														
	---	---	---	---	●	12V	20	1P	---	---	---	●	035812P		
	---	---	---	---	●	12V	20	1N	---	---	---	●	035812N		
MICRORELEX R2 "pcb" execution  flush mounting Bricky execution 	It is a unit with 2 small relays to be driven separately or contemporarily (using programmable jumper setting) by standard 12Vdc input signals; or with proper interconnection, it is a latching relay with one SPDT output contact. Execution and dimensions like double unit Bricky module.														
	---	---	---	---	●	12V	40	---	---	●	---	●	035822		
	---	●	●	---	---	12V	40	---	---	●	---	●	034753R2		
SPECIAL INTERFACE MODULES to upgrade condominium entrygate	It is a small relay unit to be driven by alternative current input signal (from 8 up to 12Vca variable voltage). It should be used as interface adapter to intercom system (old generation) typically operates on 8 ÷ 12Vca voltage. Ideal to upgrade the existing conventional condominium entrygate to be equipped with advanced Tecnodimensione electrical bolts Tronix version.														
MICRORELEX R1C pcb execution  flush mounting Bricky execution  surface Bricky execution 	---	---	---	---	●	8/12 Vac		30	---	●	---	●	035811C		
	●	---	●	---	---	8/12 Vac		30	---	●	---	●	034753R1C		
	●	---	---	●	---	8/12 Vac		30	---	●	---	●	034753R1CA		

Notes: MICRORELEX "visible" models must be installed in junction boxes and/or housings.

Bricky models can be combined with other Bricky elements (see the applicable price list under item "BRICKY") and arranged in a "mosaic" pattern on panels or consoles or even installed in the small frames with plates that are typically used with electrical switches (junction box "503").

LOGIC MODULES FOR DOOR MANAGEMENT

Export Product-list

January 2024

TECNODIMENSIONE®

Ordering
information

Q.ty
N°

CHARACTERISTICS TECHNICAL

Very compact electronic board of various size to control the door opening procedure for any doors equipped with electrical bolts or electrical door strikes.

DOOR "TIMED" OPENING

COMMAND with auto-relock
Field adjustable 1 ÷ 20 sec
● Fixed 3 - 5 sec (not adjustable)

AUTOMATIC RE-LOCK PROGRAM

for electrical locks
(fail-secure and fail-safe)

REBOUND COMPENSATION LOGIC

with attempts to autorelock

COURTESY SERVICE

electronic key override with timed
unlock and auto re-lock

TAMPER PROTECTION

in standby;
the bolt sensor is not affected

DAY/NIGHT PROGRAM

- unlimited unlock (day)
- permanent lock (night)

REMOTE INDICATIONS OUTPUTS

● door status (aligned & closed)
○ bolt status (door locked)

INTERLINK of 2 same modules

● 2 doors interlock (mutual logic)
○ multiple interlock (3 or more doors)

OPERATING VOLTAGE

Vdc

POWER CONSUMPTION

mA

MICROTIMER

It is a micromodule (built-in onto a sealed plastic housing) that provides to open the door by a temporized command. The output is a SPDT contact 1A/12Vdc rated with program-mable setting for electrical door strike or electrical bolts, magnet lock (either fail-secure or fail-safe version).

○	●	---	---	---	●	---	---	12V	80
								24V	80

035902
035904

TRONIX for flush mounting

It is a "compact" micromodule SMD execution for universal 12V or 24Vdc operating voltage. Multifunctional device to be used to control and drive any electrical bolts, magnetic lock, on "Z" setting (either fail-secure or fail-safe version).

●	●	●	---	●	●	●○	●	12V	80
								24V	

035952

LOGICAL CARDS

FOR DOOR INTER-SIGNALLING WITH ACKNOWLEDGMENT

PHARMABLOCK

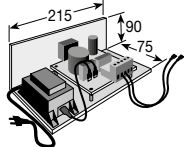

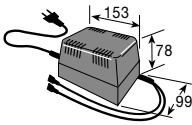

Ideal for clean rooms, anti-contamination changing rooms used, pharmaceutical laboratories, research departments and controlled areas.

Logical card in Print Mather Board execution (without housing) prepared to manage with visually lights (without locks) the interdependence of 2 doors + 2 doors with presence control (changing room in use).
Alarm relay for simultaneously opened doors. 12VDC/100 mA power supply.

Note: the selling of these module are dovoted to specialised installers and is used to interface the systems present in clean rooms.

Pharmablock control units for several zones with preset logics are also available on request (see below).

034742H

POWERBLOCK PROFESSIONAL POWER SUPPLIES		Export Product-list January 2024	
POWER UNITS WITH BUILT-IN BATTERY CHARGER All the types are equipped with special protections: <ul style="list-style-type: none"> • electronic protection in case of short circuit of one or more elements of the batteries • circuitry fully protected by fast fuses • with "sealed type" safety transformer • inside of the sealed transformer is built-in autoresettable "thermal protection device" at 110 °C threshold switching (to provide the complete switch-off of the transformer from the mains, with automatic switch-on when normal situation is restored) • complete with 1,5mt long cable with europlug for 230Vac/50÷60Hz mains. 		 TECNODIMENSIONE®	
		Ordering information 	Q.ty N°
MODELS			
MINI-POWERBLOCK "open" execution (without housing) 		S034770G S034771G	
STABILIZED RECTIFIER UNITS WITH BATTERY CHARGER "Open" execution (without housing) with transformer compacted on "L shape" dissipation plate Battery charger-stabilized rectified unit 12Vdc/2,7A total charge. Complete with "sealed type" safety transformer equipped with built-in autoresettable "thermal protection device" at 110 °C threshold switching. With 1,5 mt cable equipped with europlug for 230Vac/50÷60 Hz mains. Output cable for 12Vdc equipped with "faston" terminals. Battery charger-stabilized rectified unit 24Vdc/1,5A total charge. Complete with "sealed type" safety transformer equipped with built-in autoresettable "thermal protection device" at 110 °C threshold switching. With 1,5 mt cable equipped with europlug for 230Vac/50÷60 Hz mains. Output cable for 24Vdc equipped with "faston" terminals.			
NOTE: The published prices do not include the batteries. Must be used specific rechargeable batteries "lead sealed type" (typical type for alarm systems).			
STABILIZED POWER UNITS (without battery charger) • Fitted with a PTC protection device against short-circuits.			
MICRO-POWERBLOCK 		034779B21	
Housed into a black plastic compact box for wall mounting (or desktop). Complete with 1,5 mt cable equipped with euro plug for 230Vac/50÷60 Hz. Output cable for 12Vdc equipped with "faston" terminals. Stabilized power supply unit with PTC protection. For 230Vac/50÷60 Hz mains - output 12Vdc/1,2Amp.
